

EXHIBIT 3

OTHER LICENSES AND APPLICATIONS (Response to Question 36)

On July 26, 2011, the IB declared null and void EchoStar's authorization to construct, launch, and operate a new Direct Broadcast Satellite at 86.5° W.L. for failure to meet the critical design review milestone, and rejected EchoStar's request to modify its 86.5° W.L. authorization to allow the in-orbit EchoStar 8 satellite to provide service from that orbital location.¹ EchoStar has filed a petition for reconsideration of the IB's decision.²

The FCC has dismissed, but not denied on the merits, a few of EchoStar's license applications without prejudice to refiling.³
