Re: Notification of resumption of inclined orbit operations for AfriStar-1 Call Sign S2367, File No. SAT-MOD-20141212-00129

Dear Ms. Dortch:

Yazmi USA, LLC ("Yazmi"), by its attorneys and pursuant to the intent of Section 25.280 of the Commission's Rules, 47 C.F.R. § 25.280, hereby confirms that its above-referenced AfriStar-1 satellite has resumed inclined-orbit operation at 21 degrees East Longitude (E.L.).

Yazmi informed the Commission of its intention to re-suspend north-south station keeping at the end of March 2015 in its modification of license application to extend the license term of AfriStar-1 (File No. SAT-MOD-20141212-00129, at Exhibit A).

After commencing inclined orbit operation initially in June 2012, Yazmi resumed north-south station keeping in July 2014. From July 2014 through March 2015, Yazmi maintained AfriStar-1 at 1.7 degrees inclination. Yazmi re-suspended north-south station keeping and resumed inclined orbit operation of AfriStar-1 on April 1, 2015.

With the resumption of inclined orbit operations, Yazmi expects AfriStar-1's inclination to grow at an average rate of 0.81 degrees per year.

The expected end of useful life for AfriStar-1 is April 2021.

Please direct any questions or comments on the above notification to me.

Respectfully submitted,

Janet Hernandez
Counsel for Yazmi USA, LLC
