PURPOSE OF MODIFICATION

27. The purpose of this proposed modification is to: (Place an 'X' in the box(es) next to all that apply.)

- a -- authorization to add new emission designator and related service
- b -- authorization to change emission designator and related service
- c -- authorization to increase EIRP and EIRP density
- d -- authorization to replace antenna
- e -- authorization to add antenna
- f -- authorization to relocate fixed station
- g -- authorization to change assigned frequency(ies)
- h -- authorization to add Points of Communication (satellites & countries)
- i -- authorization to change Points of Communication (satellites & countries)
- j -- authorization for facilities for which environmental assessment and radiation hazard reporting is required
- k -- Other (Please specify)

ENVIRONMENTAL POLICY

28. Would a Commission grant of any proposal in this application or amendment have a significant environmental impact as defined by 47 CFR 1.1307? If YES, submit the statement as required by Sections 1.1308 and 1.1311 of the Commission's rules, 47 C.F.R. 1.1308 and 1.1311, as an exhibit to this application. A Radiation Hazard Study must accompany all applications for new transmitting facilities, major modifications, or major amendments.

42a. Does the applicant intend to use a non-U.S. licensed satellite to provide service in the United States? If Yes, answer 42b and attach an exhibit providing the information specified in 47 C.F.R. 25.137, as appropriate. If No, proceed to question 43.

Yes  No

42b. What administration has licensed or is in the process of licensing the space station? If no license will be issued, what administration has coordinated or is in the process of coordinating the space station?

43. Description. (Summarize the nature of the application and the services to be provided). (If the complete description does not appear in this box, please go to the end of the form to view it in its entirety.)

This amendment corrects certain technical parameters contained in Space Imaging's pending space station modification application. See SAT-AMD-19990114-00009. In 1998, Space Imaging filed a modification application that requested authority to extend the launch milestone for its IKONOS satellite, which is also known as USASAT30B and as S2144. See

Annex

#### CERTIFICATION

The Applicant waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. The applicant certifies that grant of this application would not cause the applicant to be in violation of the spectrum aggregation limit in 47 CFR Part 20. All statements made in exhibits are a material part hereof and are incorporated herein as if set out in full in this application. The undersigned, individually and for the applicant, hereby certifies that all statements made in this application and in all attached exhibits are true, complete and correct to the best of his or her knowledge and belief, and are made in good faith.

**43. Description. (Summarize the nature of the application and the services to be provided).**

This amendment corrects certain technical parameters contained in Space Imaging's pending space station modification application. See SAT-AMD-19990114-00009. In 1998, Space Imaging filed a modification application that requested authority to extend the launch milestone for its IKONOS satellite, which is also known as USASAT30B and as S2144. See SAT-MOD-19980612-00052. In 1999, Space Imaging amended the pending modification application to correct certain technical parameters in the space station license. See SAT-AMD-19990114-00009. Because the modification application and the 1999 amendment remained pending when Space Imaging launched IKONOS, the FCC granted Space Imaging prior special temporary authority to operate IKONOS consistent with the amended technical parameters. Space Imaging sought the technical changes described above as the natural result of design evolution over the satellite's five-year planning period; however, certain corrections need to be made to the 1999 technical amendment. The attached Technical Annex provides the new values and the reason for the change.
