Re: File No. SAT-MOD-20150802-00053, Call Sign S2912

Dear Ms. Dortch:

Planet Labs Inc. ("Planet") hereby informs the Commission that Planet is no longer pursuing the launch of 56 Dove satellites ("Flock 2c") on the SpaceX FormoSat-5/SHERPA mission. Planet has no plans to replace that launch with another launch to a similar elliptical orbit; all further Planet launches are to be below 660 km altitude, pursuant to the conditions detailed in SAT-MOD-20150802-00053 and consistent with the agreement with ORBCOMM License Corp. See Letter from Mike Safyan, Director of Launch and Regulatory Affairs of Planet Labs Inc., and Walter Sonnenfeldt, Regulatory Counsel ORBCOMM License Corp., to Jose Albuquerque, Chief, Satellite Division, International Bureau, FCC (September 14, 2016).

Respectfully Submitted,

/s/ Mike Safyan
