Sirius XM Radio Inc. Application for Modification IBFS File No. SAT-MOD-20151211-00081 Call Sign S2710

The application of Sirius XM Radio Inc. (Sirius XM), IBFS File No. SAT-MOD-20151211-00081, to modify its authorization to operate the Satellite Digital Audio Radio Service (SDARS) space station, FM-5 (Call Sign S2710), IS GRANTED. Accordingly, Sirius XM is authorized to provide SDARS via FM-5 at the 86.15° W.L. orbital location, instead of its currently authorized orbital location at 96.0° W.L., in the 2320.0-2332.5 MHz (space-to-Earth), and 7050.5-7072.5 MHz (Earth-to-space) frequency bands. In addition, Sirius XM is authorized to conduct Telemetry, Tracking, and Command (TT&C) operations necessary to relocate the FM-5 space station to, and maintain it at the 86.15° W.L. orbital location using the following center frequencies: 2320.5 MHz, 2321.0 MHz, 2331.5 MHz, and 2332.0 MHz (space-to-Earth); and 7052.0 MHz and 7056.0 MHz (Earth-to-space). Sirius XM is also authorized to provide SDARS via FM-5 in the 2320.0-2332.5 MHz and 7050.5-7072.5 MHz frequency bands during the drift to 86.15° W.L. Additionally, the license term for FM-5, which expires on August 25, 2017, is extended for an additional eight years, through August 25, 2025. All operations of the FM-5 space station must be in accordance with the technical specifications set forth in its application, the Federal Communication Commission (Commission) rules, and the conditions set forth below.

- 1. Sirius XM must prepare the necessary information, as may be required, for submission to the International Telecommunication Union (ITU) to initiate and complete the advance publication, international coordination, due diligence, and notification process of this space station, in accordance with the ITU Radio Regulations. Sirius XM shall be held responsible for all cost-recovery fees associated with ITU filings. We also note that no protection from interference caused by radio stations authorized by other administrations is guaranteed unless coordination and notification procedures are timely completed or, with respect to individual administrations, by successfully completing coordination agreements. Any radio station authorization for which coordination has not been completed may be subject to additional terms and conditions as required to effect coordination of the frequency assignments of other administrations. See 47 C.F.R. § 25.111(b).
- 2. Sirius XM must operate FM-5 at 86.15° W.L. with an east-west longitudinal station-keeping tolerance of +/-0.05 degrees.
- 3. Sirius XM must operate the FM-5 space station in compliance with international coordination agreements with Canada and Mexico that limit the power flux density level from U.S.-licensed DARS space stations into Canada and Mexico.
- 4. Sirius XM's operation of the FM-5 space station is subject to the conditions in its current authorization, SAT-LOA-20060901-00096.
- 5. Sirius XM is afforded 30 days from the date of this grant to decline this authorization as conditioned. Failure to respond within that period will constitute formal acceptance of the authorization as conditioned.
- 6. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 of the Commission's rules or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106, 1.115, may be filed within 30 days of the public notice indicating that this action was taken.
