Intelsat License LLC

Application to Modify Authorization for
Intelsat 10 (S2382)

File No. SAT-MOD- _____

**APPLICATION OF INTELSAT LICENSE LLC
TO MODIFY AUTHORIZATION FOR INTELSAT 10**

Intelsat License LLC (“Intelsat”), pursuant to Section 25.117 of the rules of the Federal Communications Commission (“FCC” or “Commission”),¹ hereby seeks to modify the authorization for the Intelsat 10 satellite (Call Sign S2382).² Intelsat 10 is currently authorized to operate at the 47.5° E.L. orbital location.³ By this modification application, Intelsat seeks to change the satellite’s C-band and Ku-band coverage areas. All other information previously provided for the operation of Intelsat 10 at 47.5° E.L. remains unchanged.⁴

¹ 47 C.F.R. § 25.117.

² Intelsat 10 was formerly known as PAS-10. *See* Letter from Susan H. Crandall, Intelsat, to Marlene H. Dortch, FCC, Notification of New Space Station Names (filed Jan. 8, 2007).

³ *See Satellite Policy Branch Information; Actions Taken*, Report No. SAT-01173, File No. SAT MOD-20160422-00038 (July 8, 2016) (extending the license term of Intelsat 10). To the extent necessary, Intelsat requests that all waivers previously granted to Intelsat 10 continue to apply.

⁴ *See Policy Branch Information; Actions Taken*, Report No. SAT-00976, File No. SAT-MOD-20130322-00052 (Oct. 25, 2013) (Public Notice) (“Intelsat 10 Modification”).

Specifically, this application seeks authority to modify the licensed operational areas for the satellite's C- and Ku-band beams to include multiple boresights on the four mechanically adjustable reflectors.⁵ Grant of this modification application will serve the public interest by allowing Intelsat to meet on-going and future customer requirements at 47.5° E.L. in an expeditious manner.

Additionally, Intelsat notifies the Commission that it now expects to dispose of the spacecraft by moving it to a planned minimum altitude of 150 kilometers (perigee) above the geostationary arc.⁶ Further discussion of post mission disposal is provided in the accompanying Engineering Statement.

In accordance with the requirements of the Commission's rules,⁷ this application has been filed electronically as an attachment to FCC Form 312. Intelsat provides the technical information relating to the proposed modification on Schedule S and in narrative form in the attached Engineering Statement.

For the reasons set forth above, Intelsat respectfully requests that the Commission grant this modification application.

⁵ The proposed coverages in this application include the coverage areas that Intelsat 10 is currently operating in pursuant to Special Temporary Authority. *See Satellite Policy Branch Information; Actions Taken*, Report No. 01411, File No. SAT-STA-20190823-00080 (Sept. 6, 2019) (Public Notice).

⁶ In 2013, Intelsat stated that it expected to de-orbit the Intelsat 10 satellite to an altitude of 300 km. *See Intelsat 10 Modification*, Engineering Statement at 8. As the Commission is aware, because there is no mechanism for precisely calculating the amount of fuel left on the spacecraft once it is in orbit, it is possible that the spacecraft will not meet the planned minimum de-orbit altitude.
