Licensee/Grantee:	DIRECTV Enterprises, LLC (DIRECTV)	
Call Sign:	S2133	
Satellite Name:	SPACEWAY 2	
Orbital Location: (required station-keeping tolerance)	138.9° W.L. (± 0.05 degrees)	
Administration:	United States of America	
Nature of Service:	Fixed-Satellite Service (FSS)	
Scope of Grant:	Authority to provide FSS via Spaceway 2 at the 138.9° W.L. orbital location instead of its previously authorized orbital location of 99.075° W.L.	
Previous Grants:	Special Temporary Authority for a 60-day period to drift S2133 from 99.075° W.L. to 138.9° W.L. orbital location. IBFS File No. SAT-STA-20200221-00018 (granted Mar. 13, 2020).

Unless otherwise specified herein, operations under this grant must comport with the legal and technical specifications set forth by the applicant or petitioner and with Federal Communication Commission's rules not waived herein. This grant is also subject to the following conditions:

1. DIRECTV shall prepare the necessary information, as may be required, for submission to the International Telecommunication Union to initiate and complete the advance publication, international coordination, due diligence, and notification process of this space station, in accordance with the ITU Radio Regulations. DIRECTV shall be held responsible for all cost recovery fees associated with these ITU filings. We also note that no protection from interference caused by radio stations authorized by other administrations is guaranteed unless coordination and notification procedures are timely completed, or with respect to individual administrations, by successfully completing coordination agreements. Any radio station authorization for which coordination has not been completed may be subject to additional terms and conditions as required to effect coordination of the frequency assignments of other administrations. See 47 CFR § 25.111(b).
2. DIRECTV must operate SPACEWAY 2 at the 138.9° W.L. orbital location in compliance with all existing or future coordination agreements for this location. In the absence of a coordination agreement, such communications must comply with applicable provisions of the ITU Radio Regulations as the Commission cannot guarantee the success of the required coordination.
3. DIRECTV must coordinate its downlink operations for the specific frequencies authorized in the 18.3-18.8 GHz and 19.7-20.2 GHz frequency bands (space-to-Earth) with United States government systems in accordance with footnote US334 to the Table of Frequency Allocation, 47 CFR § 2.106. DirecTV should be aware that there are US Government satellite operations at the 141° W.L. orbital location and

- that US334 coordination may not be based on the Commission's two-degree spacing policy.
4. DIRECTV must conduct its operations pursuant to this authorization in manner consistent with the power flux-density requirements of footnote US255 to the Table of Frequency Allocation, 47 CFR § 2.106, 47 CFR § 25.138(a)(6), and 47 CFR § 25.208(d), of the Commission's Rules.
 5. The operations of SPACEWAY 2 and associated earth stations must comport with the applicable uplink and downlink limits in 47 CFR § 25.140(a)(3) of the Commission's rules, unless DIRECTV coordinates any non-conforming operations with the operations of U.S.-licensed geostationary orbit space stations within 6 degrees of the 138.9 W.L. orbital location. DIRECTV must also comport with the maximum power limits indicated in existing or future coordination agreements at 138.9 W.L. orbital location. Non-conforming operation must also be coordinated with respect to those operations of non-U.S.-licensed space stations within 6 degrees of 138.9 W.L. involving approved communications with U.S.-licensed earth stations.
 6. DIRECTV must continue to operate the DIRECTV SPACEWAY 2 space station at the 138.9° W.L. orbital location subject to the conditions in prior grants.
 7. DIRECTV must maintain the DIRECTV SPACEWAY 2 space station at the 138.9° W.L. orbital location with an east/west longitudinal station-keeping tolerance of ± 0.05 degrees.
 8. DIRECTV is granted a waiver of Section 25.283(c) of the Commission's rules, 47 C.F.R. 25.283(c). Section 25.283(c) specifies that space stations must discharge all stored energy sources at end-of-life of the space station. SPACEWAY 2 is a Boeing 702 model spacecraft. DIRECTV has indicated that due to its design, SPACEWAY 2's two helium tanks were sealed immediately following the last orbit-raising maneuver during the launch phase for the satellite and cannot be further discharged. DIRECTV states that each of the sealed helium tanks each contain approximately 510 grams of helium, with each tank volume being approximately 0.0688 m³. Further, DIRECTV states that SPACEWAY 2's two xenon propellant tanks lack the ability to be discharged, which will result in each tank having a residual xenon mass of approximately 5.05 kg at the end-of-life of the space station, with each tank volume being approximately 0.0688 m³.¹ This waiver is granted because modification of the spacecraft would present an undue hardship, since SPACEWAY 2 is an in-orbit space station and venting SPACEWAY 2's helium and xenon tanks would require direct retrieval of the satellite, which is not currently possible. In making this determination, we note that the information submitted in the application is not sufficient to support a finding that the intent of the rule would be satisfied by the described procedures for sealing the helium and xenon tanks.
 9. Within 30 days of completion of the end-of-life maneuvers, DIRECTV must send a letter to the Chief, Satellite Division, International Bureau, indicating the apogee and perigee of the DIRECTV SPACEWAY 2 disposal orbit.
 10. DIRECTV must file with the Commission the information required by section 25.172 of the Commission's rules, 47 CFR § 25.172.
 11. Nothing in this grant changes the license term for the SPACEWAY 2 space station (Call Sign S2133), which expires on April 14, 2021 (see IBFS File No. SAT-LOA-19931203-00041).

Licensee/grantee is afforded thirty (30) days from the date of release of this action to decline the grant as conditioned. Failure to respond within this period will constitute formal acceptance of the grant as conditioned.

This action is taken pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective upon release.

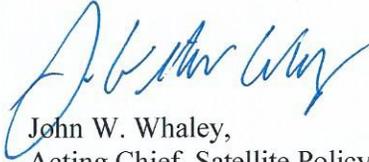

¹ We note that DIRECTV currently intends to allocate and reserve approximately 3.94 kg of propellant for final orbit raising maneuvers for Spaceway 2 to its desired disposal orbit of at least 267.6 km above the geostationary arc, as calculated using the IADC formula. See Engineering Statement at 5.

CERTIFICATION

The Applicant waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. The applicant certifies that grant of this application would not cause the applicant to be in violation of the spectrum aggregation limit in 47 CFR Part 20. All statements made in exhibits are a material part hereof and are incorporated herein as if set out in full in this application. The undersigned, individually and for the applicant, hereby certifies that all statements made in this application and in all attached exhibits are true, complete and correct to the best of his or her knowledge and belief, and are made in good faith.
