

Attachment to Receiving and Transmitting Beam Section of Schedule S

Call Sign S2993

The form Schedule S does not appear to include input fields for minimum G/T or 3 dB beamwidth. The values for the receiving beams are therefore provided in the table below using the same beam identification numbers (“IDs”) that are included in the “Receiving Beams” and “Transmitting Beams” sections of the Schedule S. In addition, the 3 dB beamwidth for the ISL transmit beams are provided in the subsequent table below again using the same beam IDs that are included in the Schedule S.

Receive Beam ID	Minimum G/T, dB/K	3 dB Beamwidth, deg
XRL1	18.6	0.7
XRL2	18.6	0.7
XRR1	18.6	0.7
XRR2	18.6	0.7

Transmit Beam ID	3 dB Beamwidth, deg
XTL1	0.7
XTL2	0.7
XTR1	0.7
XTR2	0.7
