

**NOTIFICATION OF
TRANSFER OF CONTROL OF US MARKET ACCESS GRANT**

This modification serves to notify the Commission of a transfer of control of Telesat International Limited, grantee of U.S. market access via the Telstar 19 Vantage (a.k.a. T19V) satellite. The transfer of control is the result of a corporate restructuring, which the Commission has consented to, whereby the grantee is now an indirect subsidiary of Telesat Corporation.¹

In response to Questions 29 of Form 312, and as set forth in the transfer of control applications granted by the Commission as identified in footnote 1, Telesat Corporation is organized under the laws of Canada. Questions 30 - 33 of Form 312 are intended to ascertain whether the applicant complies with Sections 310(b)(3) and 310(b)(4) of the Communications Act, which establish limits on foreign ownership of the licensees of broadcast, common carrier, aeronautical *en route*, and aeronautical fixed stations. Sections 310(b)(3) and 310(b)(4) are inapplicable to the proposed satellites because the satellite constellation is not an aeronautical *en route* or aeronautical fixed station and Telesat International Limited does not propose to provide broadcast or common carrier service via the satellite constellation.

¹ The Commission has consented to this transfer of control in connection with space station, earth station, and Section 214 licenses and authorizations held by Telesat Canada and its subsidiaries. See FCC File Nos.
