Re: *Correction of Typographical Error*
New Skies Satellites, B.V., File No. SAT-PPL-20080811-00152

Dear Ms. Dortch:

It has come to our attention that the above referenced application to add the NSS-9 satellite to the Commission's Permitted Space Station List contains a typographical error. Specifically, the response to Question 24 on Form 312 indicates that the satellite will operate in both the C-band and Ku-band. As repeatedly and consistently demonstrated throughout the remainder of the application materials, however, we request only that NSS-9 be added to the Permitted List for service in the C-band. Checking the box for Ku-band in response to Question 24 was a typographical error.

We hereby confirm that the application should relate solely to the C-band, and request that the typographical error indicating operation in the Ku-band be removed. We apologize for any confusion this may have caused.

Respectfully submitted,

William M. Wiltshire
Counsel for New Skies Satellites, B.V.
