**Re: Telesat Brasil Capacidade de Satelites Ltda. ("Telesat Brasil")
Petition for Declaratory Ruling ("PDR")
SAT-PPL-20110112-00012**

Dear Ms. Dortch:

In the above-referenced filing, Telesat Brasil seeks a declaratory ruling adding its Estrela do Sul 2 satellite, which has been licensed by Brazil, to the Permitted Space Station List. Telesat Brasil, by its undersigned counsel, hereby clarifies the following elements of its filing:

The PDR is limited to conventional Ku-band band frequencies. Telesat is not seeking authority in the PDR to operate on any other frequencies.¹

Estrela do Sul 2 is a replacement for Estrela do Sul 1, which will be boosted to a disposal orbit once it has been replaced.

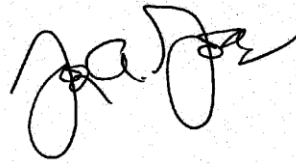

Telesat Brasil is not seeking authority in the PDR to make use of analog TV/FM carriers in the United States. Such carriers have been identified in Schedule S solely for informational purposes, based on their possible use outside the United States.

¹ As stated in the PDR (at n. 4), however, a sister company of Telesat Brasil will be filing one or more earth station applications seeking authority to communicate with Estrela do Sul 2 using extended Ku-band frequencies on the satellite in the 13.8-14 GHz band. The Commission already has authorized communication with Estrela do Sul 1 using these same extended Ku-band frequencies. See FCC File No. SES-MFS-20070502-00542.
