

Information Required in 47 C.F.R. § 25.137

Empresa Argentina de Soluciones Satelitales S.A. (“ARSAT”), an Argentine corporation, respectfully files this Petition for a Declaratory Ruling pursuant to Section 25.137 of the Commission’s Rules to add its C-band and Ku-band satellite ARSAT-2 to the Permitted Space Station List at the 81°W orbital location.

Section 25.137(a) – Competitive Analysis

Not required. Argentina, the licensing administration, is a member of the World Trade Organization (“WTO”). Additionally, the United States and Argentina have a bilateral agreement that covers additional services requested in this Petition. ARSAT is not requesting authority to provide any service that is not covered under the WTO Telecom Agreement or under United States and Argentina bi-lateral agreements. *See* Petition for Declaratory Ruling, Section I for further information.

Section 25.137(b) – Legal and Technical Information

The required information is submitted in the Petition for Declaratory Ruling, Form 312 and associated Exhibits.

Section 25.137(d) – Financial Requirements

ARSAT-2 is already in orbit and operating and is the second geostationary satellite launched and operated by ARSAT. Therefore it is not necessary for ARSAT to provide financial information for the Commission to determine that ARSAT is financially capable of building, launching, and operating a satellite. *See* Petition for Declaratory Ruling, Section I.
