

## EXHIBIT C

### WAIVER REQUESTS

#### Section 2.106 Footnotes US 245 and NG52

Hispasat requests waiver of Section 2.106 Footnotes US 245 and NG52, which permit the use of the 4500-4800 MHz and 13000-13250 / 10700-11700 MHz frequency bands by non-federal fixed satellite service for international systems only<sup>1</sup>;

HISPASAT-30W-6 will utilize the 6725-7025 / 4500-4800 MHz and 13000-13250 / 11200-11450 MHz frequency bands to provide service to U.S. territory and:

- for the frequency ranges 13000-13250 / 11200-11450 MHz, HISPASAT requests a waiver to allow use of these bands for domestic service use on a non-interference, non-protected basis, and
- for the frequency range 4500 - 4800 MHz (space to Earth), HISPASAT requests a waiver to allow use of this band for domestic service use and international non-intercontinental use on a non-interference, non-protected basis.

Good cause for a waiver exists in this case. Grant of the requested waiver to permit domestic use of these frequencies would be consistent with some precedent<sup>2</sup>. As in those cases, grant of the requested waiver will make available additional domestic capacity without risk of harmful interference because HISPASAT 30W-6 will operate on a non-interference, non-protected basis.

#### Section 25.210(f)

HISPASAT requests a partial waiver of Part 25.210(f). Due to satellite design constraints, this satellite did not have enough capacity to be equipped with frequency reuse for some frequencies in the coverage of the United States.

#### Section 304 of the Communications Act

It is also required that each application must also contain the formal waiver required by section 304 of the Communications Act, 47 U.S.C. 304. Such formal waiver is hereby formally requested.
