**Re: Identification of Satellites Co-Located with AMC-15,
File Nos. SAT-LOA-20030219-00013 *et al.*, Call Sign S2180**

Dear Ms. Dortch:

SES AMERICOM, Inc. ("SES AMERICOM"), by its attorneys, hereby provides the report required pursuant to the Commission's authorization of the above-referenced satellite, granted August 18, 2004. Specifically, paragraph 11 of the terms and conditions of the authorization requires that SES AMERICOM provide a written statement identifying satellites that will be located at or near the assigned orbital location of AMC-15 and describing the measures that will be taken to prevent in-orbit collisions.

AMC-15 is assigned to 105° W.L., and will provide follow-on Ku-band capacity for AMC-2, which currently operates at that position. SES AMERICOM is not aware of any other FCC- or non-FCC-licensed spacecraft that are operational or planned to be deployed at or near 105° W.L. whose station-keeping volume would overlap with that of AMC-15.

The Massachusetts Institute of Technology's Lincoln Laboratories advises SES AMERICOM regarding government spacecraft and other objects that approach or might enter an assigned station-keeping volume of SES AMERICOM's operational spacecraft. SES AMERICOM coordinates either through Lincoln Labs or the other Commercial Satellite Operator with respect to any actions that are appropriate at those times to avoid any risk of collision.
