Re: Galaxy 1R  
Final Orbit Parameters

Dear Ms. Dortch:

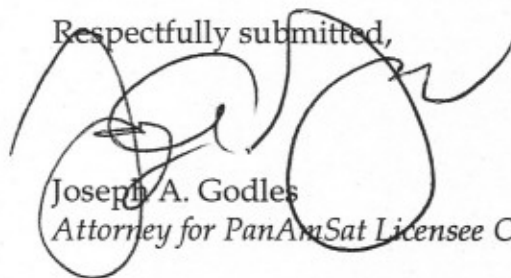

PanAmSat Licensee Corp. ("PanAmSat"), by its counsel, hereby notifies the Commission of the final orbit parameters for Galaxy 1R.<sup>1</sup> PanAmSat completed end-of-life maneuvers for the satellite on March 7, 2006, resulting in an orbital position with an apogee of 304 km above the geostationary orbit, a perigee of 293 km above the geostationary orbit, and an inclination of 0.16 degrees. The fuel tanks of the satellite have been purged, all the electronics have been powered down and disabled, and all communications with the satellite have ceased.

<sup>1</sup> PanAmSat is submitting this letter pursuant to a February 14, 2006, grant of Special Temporary Authority ("STA"), in which the International Bureau conditioned the STA grant on PanAmSat providing the Commission with written notification of the end-of-life apogee and perigee for Galaxy 1R. See File No. SAT-STA-20060131-00012.
