Subject: Sirius Repeater Problems

Im just wondering what the status is with the repeater problem in the Harrisburg area? Is anything even being done to fix this problem? Everytime I try to get answers, I just get the runaround, im sorry but my grandma could of fixed the repeaters herself by now, and she doesn't even have any arms. People are totally incompetant these days, im talking about government and people from Sirius. This country is going downhill really fast.
