Subject: NAB and SAT-STA-2006101300121 & SAT -STA-2006101300122

Will the Commission ignore the comments of the NAB (see below) in much the same way the it ignores the comments of individual consumers? I would hope not, because the longer the Commission sits on this issue and does nothing, the more the NAB likes it. Unfortunately, that also means more time that Sirius subscribers in the Harrisburg area will hear silence on their satellite radios everytime they are stuck in a wooded area or under an overpass or in their office. Just like they have been hearing since

October of 2006. Please consider allowing Sirius to turn on the requested repeaters, and please consider it soon. HOW LONG IS LONG ENOUGH!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
