Hi Andrea -- due to the further delay of G11's stay at nominal 93 W.L. during the eclipse to back-up G 26, the testing that is the subject of the above referenced STA request will now begin on November 5. Thus, the 14-day period should be November 5 through November 18. Please let me know if you need me to file anything or if you have any questions. Thanks.

Hi Andrea -- I wanted to let you know that the G11 testing at 32.5 E.L. that is the subject of the above referenced STA request has been delayed. Instead of starting the testing on September 3, we currently plan on starting the testing on September 22. Accordingly, the 14-day STA period should be September 22 through October 5, 2008, rather than the requested September 3 through September 16 time period. Do you need us to file a new STA request, or will this e-mail suffice to enable you to make the change in the STA time period? Just let me know. Thanks.

**Susan H. Crandall**
