**Re: Sirius XM Radio Inc.
Request for 180-Day Special Temporary Authority to Operate Six New Low
Power Repeaters at Various Locations, File No. SAT-STA-20090721-00074**

Dear Ms. Dortch:

On July 21, 2009, Sirius XM Radio Inc. ("Sirius XM") filed the above-referenced application for authority to operate new terrestrial repeaters. Sirius XM herein clarifies that the application requests authority for five new low power repeaters in the former Sirius Satellite Radio Inc. ("Sirius") frequency band (2320-2332.5 MHz) and only one new low power repeater in the former XM Radio Inc. frequency band (2332.5-2345 MHz). The first paragraph of the cover letter had erroneously stated that Sirius XM was requesting authority to operate five new low power repeaters in the former Sirius band and two new low power repeaters in the former XM band. The request for five new repeaters in the former Sirius band and one new repeater in the former XM band is consistent with Exhibit A and other supporting documentation filed with the application.

Please direct any questions regarding this matter to the undersigned.

Very truly yours,

James S. Blitz
Vice President, Regulatory Counsel
