**Attachment to Grant  
EchoStar Corporation  
IBFS File No. SAT-STA-20100203-00020**

The request of EchoStar Corporation (EchoStar), IBFS File No. SAT-STA-20100203-00020, is GRANTED IN PART AND DEFERRED IN PART. Accordingly, EchoStar is authorized, for a period of 60 days commencing on February 15, 2010, to conduct Telemetry, Tracking, and Telecommand (TT&C) operations necessary to drift the EchoStar 6 space station, Call Sign S2232, from the 72.7° W.L. orbital location to the 61.65° W.L. orbital location. EchoStar is authorized to use the 14,002.5 MHz and 17,305 MHz frequencies for telecommand and the 12,203 and 12,204 MHz frequencies for telemetry during these operations. We defer action on EchoStar's request to operate EchoStar 6 at the 61.65° W.L. orbital location temporarily as an in-orbit spare. This authorization shall be in accordance with the technical specifications set forth in EchoStar's application, the Commission's rules, and is subject to the following conditions:

1. All operations during the drift shall be on an unprotected and non-harmful interference basis, *i.e.* EchoStar shall not cause harmful interference to, and shall not claim protection from interference caused to it by, any other lawfully operating radiocommunication station.
2. In the event of any harmful interference during EchoStar 6's drift to the 61.65° W.L. orbital location, EchoStar shall cease operations immediately upon notification of such interference and EchoStar shall inform the Commission in writing within three days of such an event.
3. During the drift to the 61.65° W.L. orbital location, EchoStar may not operate EchoStar 6's communications payload.
4. EchoStar's request for a waiver of Section 25.202(g) of the Commission's rules, 47 C.F.R. § 25.202(g), is granted. Section 25.202(g) requires that "telemetry, tracking and

**Attachment to Grant  
EchoStar Corporation  
IBFS File No. SAT-STA-20100203-00020**

telecommand (TT&C) functions for U.S. domestic satellites shall be conducted at either or both edges of the allocated band(s). Frequencies, polarization, and coding shall be selected to minimize interference into other satellite networks and within their own satellite system."

EchoStar requests waiver of this rule provision to allow it to conduct TT&C in the 14 GHz frequency band during drift of the EchoStar 6 space station to 61.65° W.L. This waiver grant is based upon the following findings:

(a) DIRECTV 1R at 72.5° WL and EchoStar 6 are both designed to receive telecommand communications on the same 17 GHz frequency, and neither satellite is capable to receive telecommand communications on any other 17 GHz frequency;

(b) EchoStar needs to operate telecommand functions for the EchoStar 6 space station outside of the 17 GHz frequency band in order to avoid interference to DIRECTV 1R when drifting EchoStar 6 from its current location of 72.7° WL;

(c) EchoStar needs to operate telecommand functions with EchoStar 6 in order to ensure safe operation of the space station during the drift from 72.7° WL to 61.65° WL;

(d) EchoStar will coordinate drift operations of EchoStar 6 with other space stations to avoid interference, and will operate EchoStar 6 on a non-interference basis during drift operations.

(e) EchoStar will conduct all TT&C operations in the 17 GHz band once EchoStar 6 reaches the 61.65° W.L. orbital location.

5. Any action taken or expense incurred as a result of operations pursuant to this special temporary authority is solely at EchoStar's own risk.

6. Grant of this authorization is without prejudice to any determination that the Commission may make regarding EchoStar's pending applications seeking to relocate the

**Attachment to Grant

IBFS File No. SAT-STA-20100203-00020**

EchoStar 12 space station to the 61.35° W.L. orbital location (IBFS File No. SAT-STA-20100203-00021) and seeking a license to maintain EchoStar 6 at 61.65° W.L. as an in-orbit space (IBFS File No. SAT-LOA-20100203-00119).

7. This action is issued pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 C.F.R. § 0.261, and is effective immediately. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Commission's rules, 47 C.F.R. §§ 1.106, 1.115, may be filed within 30 days of the date of the public notice indicating that this action was taken.

|--|----------------------------|

**APPLICATION FOR SPECIAL TEMPORARY AUTHORITY<sup>1</sup>**

By this Application, EchoStar Corporation (“EchoStar”) requests special temporary authority (“STA”) for 60 days (a) to move the EchoStar 6 satellite from its current orbital position at 72.7° W.L., where it is operating under Canadian authority, to the 61.65° W.L. orbital location; and (b) to operate the satellite at 61.65° W.L. This temporary move is necessitated by the recent loss of additional transponder capacity on EchoStar 3. In light of the timing exigencies posed by this further, and unforeseen, loss, EchoStar requests action by no later than February 15, 2010.

EchoStar is currently operating two Direct Broadcast Satellite (“DBS”) service satellites at the nominal 61.5° W.L. orbital location – EchoStar 3 and EchoStar 12 (formerly Rainbow 1). As the Commission is aware, EchoStar 3 has experienced several transponder failures due to Traveling Wave Tube Amplifier (“TWTA”) anomalies, and has been operating at reduced

---

<sup>1</sup> Concurrent with this application, EchoStar is filing (1) an application to operate the satellite as an in-orbit spare and to activate the communications payload as needed; (2) STA applications to operate five transmit/receive earth stations to provide TT&C service to EchoStar 6 during its relocation to 61.65° W.L. (“Relocation STAs”); and (3) STA applications to operate three transmit/receive earth stations to provide TT&C and feeder link communications for EchoStar 6 once it is located at 61.65° W.L. (“On-Station STAs”).

capacity.<sup>2</sup> On January 7, 2010, EchoStar 3 experienced another TWTA anomaly further diminishing its operating capacity. As a result of this failure, EchoStar will not be able to maintain the current level of service provided from 61.5° W.L. unless it relocates at least one additional satellite to the orbital location. EchoStar, therefore, requests authority to temporarily relocate EchoStar 6 to 61.65° W.L. where it will be maintained as an in-orbit spare and will supplement, as needed, the service provided by EchoStar 3 and EchoStar 12 to maintain regular programming.

The proposed redeployment will ensure that EchoStar's customer, DISH Network Corporation, will be able to continue providing high-quality DBS service to consumers without any service interruptions until EchoStar's EchoStar 15 satellite begins operating at 61.5° W.L.<sup>3</sup> EchoStar 15, a 32-transponder-capable DBS satellite, is expected to effectively replace EchoStar 3 and will be ready for launch by the fourth quarter of 2010.<sup>4</sup> Upon launch and successful testing of EchoStar 15, EchoStar currently expects to return EchoStar 6 to its current home – 72.7° W.L. EchoStar has been advised by its partner, Telesat Canada, which has the license for that Canadian orbital location, that the move from, and return to, 72.7° W.L. is not likely to cause regulatory concern on the part of Industry Canada. In any event, any redeployment of

---

<sup>2</sup> See EchoStar 3 Status Report, File No. SAT-STA-20090821-00092 (filed Dec. 30, 2009) ("EchoStar 3 Status Report"); *EchoStar Satellite Operating Corporation, Application for Extension and Modification of Special Temporary Authority to Operate Direct Broadcast Satellite Service over Channels 23 and 24 at the 61.5° W.L. Orbital Location*, Order and Authorization, 22 FCC Rcd. 2223, at ¶¶ 4-6 (2007).

<sup>3</sup> EchoStar has previously informed the Commission that it has initiated construction of the satellite at EchoStar's own risk, and intends to file an application seeking authority to launch and operate the satellite in the immediate future.

<sup>4</sup> See EchoStar 3 Status Report.

EchoStar 6 will take place after securing all necessary authority, and EchoStar will advise the Commission of any change in its plans.

For the reasons set forth herein, grant of this Application will not cause harmful interference to any authorized user of the spectrum and will serve the public interest.

#### **I. GRANT OF THIS APPLICATION IS IN THE PUBLIC INTEREST**

EchoStar and its predecessors have been providing consumer DBS service from the 61.5° W.L. orbital location since 1998. The STA requested in this application is in the public interest because it will ensure continuity of national programming for consumers in the event of a service outage until EchoStar 15 is brought into service later this year. Nor will this move entail a service interruption at 72.7° W.L., since Nimiq 5 will continue to provide service from that orbital slot.<sup>5</sup>

The relocation of EchoStar 6 to 61.65° W.L. and its operation as an in-orbit spare will not cause harmful interference to any other U.S.-licensed satellite operator. To the east, there are no operational BSS satellites serving the United States within 9 degrees of 61.65° W.L., other than EchoStar's own EchoStar 12 satellite.<sup>6</sup> To the west, the closest operational BSS satellite serving the United States is the DIRECTV 1R satellite, which is operating at 72.5° W.L. under Canadian authority. The DIRECTV satellite would be more than 10 degrees away from the proposed

---

<sup>5</sup> See File No. SES-LFS-20080512-00595 (granted July 28, 2008); *see also* File No. SAT-MOD-20070912-00124 (filed Sept. 12, 2007). In 2007, XM Radio Inc. requested similar authority to operate two satellites as in-orbit spares at the 85° W.L. orbital slot and authority to activate the satellites' communications payload in the event of a service outage on either of its two operating satellites.<sup>5</sup> The Commission granted this request subject to a notification condition. That condition is not necessary here – the DBS industry, and DISH in particular, has a long history of activating spares without incident.

<sup>6</sup> Concurrent with this application, EchoStar is filing an application requesting STA to move EchoStar 12 to 61.35° W.L. to accommodate EchoStar 6.

orbital location for EchoStar 6 and, therefore, would not experience additional interference as a result of the proposed operations.

Finally, the proposed temporary operation of the EchoStar 6 satellite at 61.65° W.L. will not create any risk of in-orbit collision. EchoStar 6 will be maintained within +/- 0.05° east/west station-keeping, which will ensure that its station-keeping volume will not overlap with EchoStar's own satellites at 61.5° W.L. EchoStar will coordinate all drift orbit operations with other potentially affected in-orbit operators.

## **II. THE PROPOSED RELOCATION IS CONTEMPLATED IN THE U.S.-CANADA LETTER EXCHANGE**

EchoStar 6 is operating at the 72.7 ° W.L. orbital location, which has been allotted to Canada under the International Telecommunication Union's Region 2 Plan for the Broadcasting-Satellite Service ("BSS"). The eventuality of moving EchoStar 6 from 72.7° W.L. has been already contemplated with specificity in the letters exchanged between the U.S. and Canadian administrations when EchoStar 6 was originally moved to 72.7° W.L.<sup>7</sup> These letters provide a clear roadmap and confirm that Commission action on the relocation of the satellite is not contingent on any prior Canadian action. The U.S. letter states: "Operation of the EchoStar 6 satellite at any location other than at the 72.7 W.L. orbital location will be subject to licensing by the FCC, including any operations as a result of equipment failure in the satellite that results in the inability to maintain the satellite within +/- 0.1 degrees of its assigned position at the 72.7 W.L. orbital location."<sup>8</sup>

The U.S. letter further states:

---

<sup>7</sup> Stamp Grant, SAT-STA-20080512-00103, Annex A to Conditions of Grant (granted July 2, 2008) ("Exchange of Letters").

<sup>8</sup> *Id.* at 2.

In the event of the exercise by EchoStar of its contractual rights to move the EchoStar 6 satellite, and in the event that there are any provisions in Telesat's license from Industry Canada, or any provisions in the Canadian laws and regulations governing the telecommunications operations of Telesat that would preclude or otherwise limit the exercise of EchoStar's contractual rights within the time frames specified in the EchoStar/Telesat/Express Vu agreement, the FCC would appreciate the opportunity to consult with Industry Canada, prior to any exercise of such licensing authority, or application of such law or regulation by Industry Canada. I would appreciate acknowledgement of these views and expression of any view which Industry Canada may have concerning the matter discussed in this paragraph. Let me also express the FCC's willingness to discuss this matter further, in the event, at a later date, it becomes necessary to do so.<sup>9</sup>

The Canadian letter, in turn, acknowledges these provisions and also states with respect to actions under Canadian law: "To the extent possible under the circumstances and the law, Industry Canada will inform the FCC of the exercise of licensing authority, or the application of law or regulation by Industry Canada, that would preclude or otherwise limit the exercise of EchoStar's contractual rights within the time frames specified in the agreement."<sup>10</sup>

EchoStar currently plans to return the satellite to 72.7° W.L. The existing letter exchange is more than adequate to cover the possibility of such a return, and there is no need for the Commission and Industry Canada to exchange letters anew at that time. If, however, either the Commission or Industry Canada disagree, any new letter can be the same in substance as the ones already in place.

### **III. USE OF THE 14 GHz BAND**

EchoStar respectfully requests temporary authority for the use of one narrow 14 GHz beacon (14002.5 MHz, specifically) for TT&C operations during EchoStar 6's relocation to 61.65° W.L. To the extent necessary, EchoStar is also requesting a waiver of the Commission's

---

<sup>9</sup> *Id.* at 3.

<sup>10</sup> *Id.* at 4.

rules requiring satellites to conduct TT&C within their allocated bands.<sup>11</sup> The Commission has previously granted a similar waiver to allow use of the 14 GHz band for transfer orbit TT&C operations in connection with this satellite.<sup>12</sup>

There is good cause for the requested waiver: it will solve a problem without creating one. The proposed use of the 14 GHz band will ensure that there is no interference to DIRECTV 1R at 72.5° W.L. as the EchoStar 6 satellite moves away from 72.7° W.L. Both EchoStar 6 and DIRECTV 1R were designed (*i.e.* “hard-wired”) to receive telecommand communications on exactly the same 17 GHz frequency. Moreover, neither satellite is equipped to receive telecommand communications on any other frequency in the 17 GHz band. It is this intractable coincidence that necessitates the use of the 14,002.5 MHz telecommand beacon on the EchoStar 6 satellite during relocation. Once EchoStar 6 reaches 61.65° W.L., TT&C operations will be provided in the 17 GHz band.<sup>13</sup>

Moreover, the proposed use of the 14 GHz band for TT&C operations during relocation will not cause any harmful interference to any adjacent satellite networks. EchoStar will use the 14 GHz frequency on the same coordinated, non-interference and non-protected basis as it did during its relocation to 72.7° W.L. and pursuant to the conditions outlined below.<sup>14</sup>

---

<sup>11</sup> Ordinarily, U.S. domestic satellites must conduct TT&C functions at the edges of the allocated service bands. *See* 47 C.F.R. § 25.202(g). The Commission may waive this requirement for good cause shown. *See* 47 C.F.R. § 1.3.

<sup>12</sup> *See* File No. SES-STA-20080512-00606 (Call Sign E070015) (granted Jul. 9, 2008).

<sup>13</sup> *See* On-Station STAs.

<sup>14</sup> *See* File No. SES-STA-20080512-00606 (Call Sign E070015) (granted Jul. 9, 2008).

#### **IV. WAIVER PURSUANT TO SECTION 304 OF THE ACT**

In accordance with Section 304 of the Communications Act of 1934, as amended, 47 U.S.C. § 304, EchoStar hereby waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise.

#### **V. CONCLUSION**

For the foregoing reasons, EchoStar respectfully requests the grant of its application for special temporary authority for 60 days to relocate EchoStar 6 to 61.65° W.L. and operate it as an in-orbit spare at that location.

During the relocation, all transponders other than the TT&C transponders will be switched off, and EchoStar will operate the satellite subject to the following conditions:

- a) EchoStar shall coordinate all drift orbit operations with other potentially affected in-orbit operators.
- b) During relocation of the EchoStar 6 satellite, operations shall be on a non-harmful interference basis, meaning that EchoStar shall not cause interference to, and shall not claim protection from interference caused to it by any other lawfully operating satellites.
- c) In the event that any harmful interference is caused as a result of operations during the relocation of the EchoStar 6 satellite, EchoStar shall cease operations immediately upon notification of such interference and shall inform the Commission immediately, in writing, of such event.

While EchoStar 6 is operating at 61.65° W.L. as an in-orbit spare, all transponders other than the TT&C transponders will remain off unless needed for backup, and it will abide by the following conditions:

- a) All operations at 61.65° W.L. shall be on a non-harmful interference basis, meaning that EchoStar shall not cause inference to, and shall not claim protection from, interference caused to it by any other lawfully operating satellites.

- b) In the event that any harmful interference is caused while the satellite is operating at 61.65° W.L., EchoStar shall cease operations immediately upon notification of such interference and shall inform the Commission immediately, in writing, of such event.

Respectfully submitted,
