Attention:	Patrick L. Donnelly		

Attachment to Grant
Application of Sirius XM Radio Inc. for Special Temporary Authority
IBFS File No. SAT-STA-20100602-00119

Special temporary authority (STA) is granted to Sirius XM Radio Inc. (Sirius XM), for a period of 180-days commencing on June 9, 2010, to continue to operate two terrestrial repeaters, each with an average Effective Isotropically Radiated Power (EIRP) of up to 2000 watts, in Puerto Rico, as set forth in Sirius XM's application. This authorization is granted according to the technical parameters specified in Sirius XM's application and is subject to the conditions below.

1. Any actions taken as a result of this STA are solely at the applicant's own risk. This STA shall not prejudice the outcome of the final rules adopted by the Commission in IB Docket No. 95-91.
2. SDARS terrestrial repeaters are restricted to the simultaneous retransmission of the complete programming, and only that programming, transmitted by the SDARS licensee's satellite(s) directly to the SDARS licensee's subscribers' receivers, and may not be used to distribute any information not also transmitted to all subscribers' receivers.
3. Coordination of the operations of the terrestrial repeaters shall be completed with all affected Administrations prior to operation, in accordance with all applicable international agreements including those with Canada and Mexico.
4. The terrestrial repeaters shall comply with Part 17 of the Commission's rules – Construction, Marking, and Lighting of Antenna Structures.
5. The terrestrial repeaters shall comply with Part 1 of the Commission's rules, Subpart I – Procedures Implementing the National Environmental Policy Act of 1969, including the guidelines for human exposure to radio frequency electromagnetic fields as defined in Sections 1.1307(b) and 1.1310 of the Commission's rules.
6. Any SDARS terrestrial repeater operating at a power level greater than 2-watt average EIRP is required to attenuate its out-of-band emissions below the transmitter power P by a factor of not less than $90 + 10 \log (P)$ dB in a 1-megahertz bandwidth outside the 2320-2345 MHz band, where P is average transmitter output power in watts. Any SDARS terrestrial repeater operating at a power level equal to or less than 2-watt average EIRP is required to attenuate its out-of-band emissions below the transmitter power P by a factor of not less than $75 + 10 \log (P)$ dB in a 1-megahertz bandwidth outside the 2320-2345 MHz band, where P is average transmitter output power in watts.
7. This STA expires after 180 days, or on the date that permanent authority to operate the covered repeater operations becomes effective, whichever occurs first.
8. Sirius XM is granted 30 days from the date of the release of this authorization to decline the authorization as conditioned. Failure to respond within that period will constitute formal acceptance of the authorization as conditioned.
9. This action is taken on delegated authority pursuant to 47 C.F.R. § 0.261 and is effective upon release. Petitions for reconsideration under 47 C.F.R. § 1.106 or applications for review under 47 C.F.R. § 1.115 may be filed within 30 days of the date of the Public Notice announcing this action.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

**Re: Sirius XM Radio Inc.
Request for Extension of 180-Day Special Temporary Authority to Operate
Two Low Power Terrestrial Repeaters in Puerto Rico
File No. SAT-STA-20091030-00115**

Dear Ms. Dortch:

Pursuant to Section 25.120(b)(2) of the Commission's rules, 47 C.F.R. § 25.120(b)(2), Sirius XM Radio Inc. ("Sirius XM"), a satellite radio licensee in the Satellite Digital Audio Radio Service, hereby requests extension of the above-referenced Special Temporary Authority ("STA") to operate in its licensed frequency band two low power terrestrial repeaters, each with an average Effective Isotropically Radiated Power ("EIRP") of 2000 watts.¹ Sirius XM requests renewal of this STA for a period of 180 days or until the Commission issues a blanket license for

¹ The Commission recently adopted formal rules for satellite radio terrestrial repeaters. Amendment of Part 27 of the Commission's Rules to Govern the Operation of Wireless Communications Services in the 2.3 GHz Band; Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310-2360 MHz Frequency Band, *Report and Order and Second Report and Order*, FCC 10-82, Para. 264 (released May 20, 2010) (the "*May 20 Order*"). The *May 20 Order* authorizes the International Bureau "to continue to grant STAs for new or modified repeaters ... [until] any permanent authorization to operate SDARS repeaters becomes effective."

repeaters used in connection with satellite radio. Absent renewal, this STA is scheduled to expire on June 8, 2010.²

Sirius XM currently operates both of the repeaters in connection with the legacy Sirius frequency band (2320-2332.5 MHz), pursuant to the STA granted by the International Bureau on December 10, 2009. Sirius XM has not changed technical parameters for the repeaters since the original grant of the STA and is not herein requesting modification of any of those parameters. Renewing this STA will serve the public interest by allowing Sirius XM to continue to provide a quality signal to its subscribers in Puerto Rico.

Sirius XM has been using the repeaters authorized in the above-referenced STA for over 180 days and is not aware of any incidents where the equipment has caused any interference to other radio services. Sirius XM emphasizes that the repeaters operate at a power level of not more than 2000 watts. As the Bureau acknowledged in granting Sirius XM's original repeater STA requests, and the WCS licensees have confirmed, operating terrestrial repeaters at an EIRP of 2000 watts or less does not pose interference concerns.³

Sirius XM will continue to comply with the conditions the Commission imposed in granting the above-referenced STA to operate the repeaters. These conditions and the technical parameters of the repeaters have provided sufficient protection to other radio services. Therefore, prompt grant of Sirius XM's extension request will allow for the continued reception of the SDARS signal in Puerto Rico.

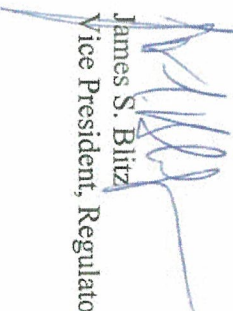

² Because this request is timely, pursuant to Section 1.62 of the Rules, this STA will continue in effect without further action by the Commission until such time as the Commission shall make a final determination with respect to this request. See 47 C.F.R. § 1.62.

³ See *XM Radio, Inc. Application for Special Temporary Authority to Operate Satellite Digital Audio Radio Service Complimentary Terrestrial Repeaters, Order and Authorization*, 16 FCC Rcd. 16781 ¶ 12 (“The comments from WCS licensees express concern about blanketing interference from DARS repeaters that operate with an Equivalent Isotropically Radiated Power (EIRP) above 2 kW”). Moreover, in March 2007, the WCS Coalition said that it will defer from objecting to STA requests that propose operations of no more than 2,000 watts EIRP, even if they do not specify peak or average EIRP, provided that grant of the STA (i) is conditioned on operation on a non-interference basis; and (ii) is subject to the condition that the issue of peak versus average EIRP will be addressed in the pending DARS rulemaking (IB Docket No. 95-91). See Letter from Paul J. Sinderbrand, Counsel to the WCS Coalition, to Ms. Helen Domenici, FCC, File No. SAT-STA-20061207-00145 (March 19, 2007). Sirius XM agrees to these conditions. In the *May 20 Order*, the Commission concluded “that SDARS terrestrial repeaters can operate at an average EIRP of 12 kw with maximum PAPR of 13 dB without causing harmful interference to WCS base station receivers.” *Id.* at Para. 243.
