Attachment to Grant

Application of XM Radio Inc. for Special Temporary Authority

IBFS File No. SAT-STA-20100702-00152

Call Sign: S2119

Special temporary authority (STA) is granted to XM Radio Inc. (XM Radio) for a period of up to 30 days, commencing on August 16, 2010, to permit XM Radio to perform test transmissions using its XM-2 spacecraft, Call Sign S2119, operating at the nominal 85° W.L. orbital location, to communicate with its Ellenwood, Georgia, earth station (Call Sign E040204). XM-2 will perform these test transmissions using the following frequencies: 7056.8450-7074.8690 MHz (Earth-to-space) and 2332.5-2345.0 MHz (space-to-Earth). This authorization is granted subject to the technical parameters specified in XM's application, the rules of the Federal Communication Commission (Commission), and the conditions below:

1. All of XM Radio's operations shall be on an unprotected and non-harmful interference basis, *i.e.*, XM Radio shall not cause harmful interference to, and shall not claim protection from interference caused to it by, any other lawfully operating station.
2. In the event of any harmful interference from XM Radio's operations, XM Radio shall cease operations immediately upon notification of such interference, and shall inform the Commission, in writing, immediately of such an event.
3. Any actions taken as a result of this STA are solely at the applicant's own risk.
4. This action is taken on delegated authority pursuant to 47 C.F.R. § 0.261 and is effective upon release. Petitions for reconsideration under 47 C.F.R. § 1.106 or applications for review under 47 C.F.R. § 1.115 may be filed within 30 days of the date of the Public Notice announcing this action.

(U.S. Code, Title 18, Section 1001), AND/OR REVOCATION OF ANY STATION AUTHORIZATION
(U.S. Code, Title 47, Section 312(a)(1)), AND/OR FORFEITURE (U.S. Code, Title 47, Section 503).

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

operations of both the XM Radio fleet and the services provided by XM Radio's affiliate, Satellite CD Radio.² Launch of XM-5 is scheduled for later this year, and XM Radio intends to test the spacecraft using its Ellenwood, Georgia earth station. In order to prepare for in-orbit testing ("IOT") of XM-5, XM Radio seeks authority to perform a rehearsal, sending signals from the Ellenwood, Georgia earth station to XM-1 and XM-2.

The test transmissions will use the frequencies for which the Ellenwood earth station and XM-1 and XM-2 are authorized, with uplinks in the X-band, 7056.8450-7074.8690 MHz, and downlinks in the S-band, 2332.5-2345.0 MHz. The transmissions will include intermittent use of an unmodulated carrier operating at the earth station's maximum authorized EIRP of 78 dBW.

The proposed testing will not cause harmful interference to the operations of any other spacecraft. The uplink frequencies used for the test transmissions will be translated in the satellites to the portion of the S-band frequencies used for terrestrial repeaters, so no interference with operational service through the XM-3 and XM-4 satellites will occur. There are no satellites using either S-band or X-band frequencies within two degrees of the nominal 85° W.L. orbital location, other than satellites operated by XM Radio. XM Radio does not share S-band spectrum with other satellite systems (except its affiliate, Satellite CD Radio), and the SDARS downlink frequencies are not subject to two degree spacing rules.

The proposed testing will also not result in harmful interference to regularly authorized terrestrial operations. The Ellenwood, Georgia earth station is fully coordinated with terrestrial licensees for the frequencies, orbital arc, and EIRP levels proposed for use in the testing, and XM Radio will not exceed the previously-coordinated parameters during the

² See File No. SAT-LOA-20090217-00025 (Call Sign S2786), grant-stamped Aug. 31, 2009.

proposed testing. In addition, and in any event, XM Radio will conduct all IOT testing on a non-harmful interference basis, and will cease transmissions promptly in the event any harmful interference is caused by such operations.

XM Radio hereby certifies that no party to this application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. § 862.

For the foregoing reasons, XM Radio respectfully requests special temporary authority for a period of up to 30 days commencing on August 16 to perform IOT rehearsal test transmissions using its Ellenwood, Georgia earth station and XM-1 and XM-2 satellites. Grant of the requested authority will serve the public interest by facilitating XM Radio's ability to evaluate the performance of its space stations and will not result in harmful interference to any other regularly authorized operations.

Respectfully submitted,

XM Radio Inc.
