Re: Request for 30-Day Extension of Special Temporary Authority for
Intelsat 3R and Extension of License Term
Call Sign: PAS-2R

Dear Ms. Dortch:

PanAmSat Licensee Corp. ("PanAmSat") herein requests a 30-day extension— from January 30, 2011 through February 28, 2011—of the Special Temporary Authority ("STA")¹ previously granted PanAmSat to drift Intelsat 3R (call sign PAS-2R) from 43.1° W.L. to 81.0° W.L. and operate the satellite temporarily at 81.0° W.L. in accordance with the Argentine Administration's ITU filings in the C- and Ku-bands.² In addition, PanAmSat seeks an extension of the Intelsat 3R license term for the duration of this STA.

In 2009, the estimated fuel on the Intelsat 3R satellite resulted in a planned de-orbit date in early-to-mid 2010. PanAmSat has since extended the satellite's estimated End of Maneuver Life through July 31, 2011 after an annual fuel usage evaluation. PanAmSat also will be filing a 180-day request for special temporary authority to continue to operate Intelsat 3R at 81.0° W.L. in accordance with the Argentine Administration's ITU filings in the C- and Ku-bands and to extend the license term of the Intelsat 3R satellite through July 31, 2011.

Grant of this STA extension request is in the public interest because it will allow PanAmSat to continue to meet customer demand at 81.0° W.L. Continued operation of Intelsat 3R will also allow PanAmSat to maximize the utility of its in-orbit assets.

¹ PanAmSat has filed this STA request, an FCC Form 159 and an \$830.00 filing fee electronically via the International Bureau's Filing System.

² See *Policy Branch Information; Actions Taken*, Report No. SAT-00713, File No. SAT-STA-20100402-00063 (Aug. 6, 2010); See *PanAmSat Licensee Corp., Request for Special Temporary Authority for Intelsat 3R (Call Sign PAS-2R)*, File No. SAT-STA-20100402-00063 (filed Apr. 2, 2010) (stamp grant with conditions Aug. 3, 2010).

Grant of this STA extension request will not result in increased risk of harmful interference. PanAmSat will continue operating the satellite's communications payload at 81.0° W.L. in accordance with Argentina's C- and Ku-band ITU filings. PanAmSat incorporates by reference its previously-filed letters demonstrating its authority to operate Intelsat 3R at 81.0° W.L.³

PanAmSat also seeks authority to extend the license term of the Intelsat 3R satellite for the duration of this STA. The Intelsat 3R satellite was launched and placed into service on February 1, 1996.⁴ Pursuant to the satellite's fifteen year license term, this authorization will expire on February 1, 2011.⁵ PanAmSat now anticipates that Intelsat 3R has sufficient fuel to continue providing service to customers through July 31, 2011.

Grant of this application is consistent with the Commission's end-of-life rules. PanAmSat anticipates that Intelsat 3R has sufficient fuel to continue providing service to customers through July 31, 2011. At that time, based on standard industry fuel gauging methods, PanAmSat anticipates having adequate fuel to de-orbit the Intelsat 3R satellite to a perigee altitude of 150 km above the geostationary arc. Finally, the requested license extension is consistent with precedent for satellites that are performing well.⁶

³ *PanAmSat Licensee Corp., Request for Special Temporary Authority for Intelsat 3R (Call Sign PAS-2R)*, File No. SAT-STA-20100402-00063 at Attachments 1 and 2 (filed Apr. 2, 2010) (stamp grant with conditions Aug. 3, 2010).

⁴ See Letter from Joseph A. Godles to Marlene H. Dortch, PanAmSat Licensee Corp. Annual Status Report at 5 (filed June 30, 2005).

⁵ See 47 C.F.R. § 25.121(a).

⁶ See, e.g. *SES Americom, Inc., Application for Modification of the Satcom C-3 License to Extend the License Term*, File No. SAT-MOD-20080318-00073 (stamp grant June 11, 2008) (granting three year extension of license term); *PanAmSat Licensee Corp., SBS-6 Modification to Extend License Term*, File No. SAT-MOD-20051020-00204 (stamp grant Aug. 17, 2006) (granting five year extension of license term).

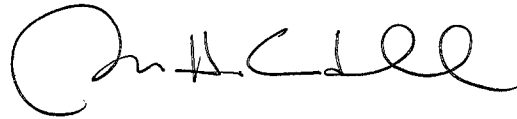

Ms. Marlene H. Dortch

January 10, 2011
