Re: Correction to Request for Special Temporary Authority to
Conduct In-Orbit Testing of New Dawn; Call Sign: S2751
File No. SAT-STA-20110302-00045

Dear Ms. Dortch:

Intelsat New Dawn Company, Ltd. ("Intelsat") herein corrects an error in the above referenced request for Special Temporary Authority ("STA") to conduct in-orbit testing ("IOT") of New Dawn (call sign S2751) at 23.1° E.L. and to drift the satellite to its permanent location of 32.8° E.L.¹ Specifically, Intelsat notes that the C-band downlink band that Intelsat intends to use is 3625-4200 MHz. The STA request inaccurately stated that the band was 3620-4200 MHz. All other frequencies listed in the STA request are accurate: 5850-6500 MHz (uplink), 10950-11200 MHz and 11450-11700 MHz (downlink), and 14000-14500 MHz (uplink).

The rescheduled launch date for New Dawn is currently April 22, 2011, as stated in a recently-filed supplement seeking a revised STA start date of May 3, 2011.²

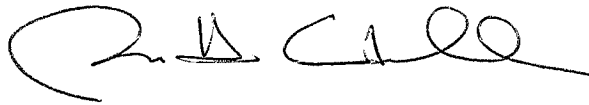

¹ See *Policy Branch Information; Actions Taken*, Report No. SAT-00574, File No. SAT-LOA-20080509-00101 (Jan. 16, 2009) (Public Notice); *Policy Branch Information; Satellite Space Applications Accepted for Filing*, Report No. SAT-00752, File No. SAT-MOD-20101029-00228 (Jan. 21, 2011) (Public Notice). During the drift from 23.1° E.L. to 32.8° E.L., only the satellite's TT&C frequencies will be utilized.

² See Letter from Susan H. Crandall, Intelsat Corporation, to Marlene H. Dortch, Federal Communications Commission, File No. SAT-STA-20110302-00045 (Apr. 12, 2011).
