Subject: IOT Testing of ViaSat-1 has commenced

Hi All,

I'm writing to confirm that ViaSat-1 reached its final orbital location of 115.1 degrees W.L. Sunday morning November 27 and IOT testing commenced shortly thereafter.

I am also confirming that the number for the WildBlue NOC is 720-493-7300 and that it is the correct 7/24 point of contact for any interference issues.

Thanks and regards,

Daryl
