Re: Request for Extension of Special Temporary Authority to Drift
Intelsat 706
Call Sign S2401

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests herein requests a 30-day extension – through June 16, 2012 – of the Special Temporary Authority ("STA")¹ originally granted Intelsat to drift Intelsat 706 (call sign S2401) from 72.0° E.L. to 177.9° E.L., where it will eventually operate in the C- and Ku-bands in inclined orbit.² Intelsat currently expects to operate Intelsat 706 at 177.9° E.L. until the satellite is de-orbited in the fourth quarter of 2013.

Intelsat 706 is currently operating at 72.0° E.L.³ Intelsat has delayed the start of drift of Intelsat 706 pending reevaluation of the deployment plan due to revised fuel information.

¹ Intelsat has filed this STA request, an FCC Form 159 and an \$860.00 filing fee electronically via the International Bureau's Filing System.

² Intelsat 706 began operating in inclined orbit mode last year. See Letter from Susan H. Crandall, Intelsat, to Marlene H. Dortch, FCC, Call Sign S2401 (filed July 20, 2011).

³ See *Policy Branch Information; Actions Taken*, Report No. SAT-00846, File No. SAT-STA-20111230-00253 (Feb. 17, 2012) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00842, File No. SAT-STA-20120209-00002 (Feb. 3, 2012) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00829, File No. SAT-STA-20111209-00237 (Dec. 16, 2011) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00826, File No. SAT-STA-20111107-00214 (Dec. 2, 2011) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00816, File No. SAT-STA-20111010-00196 (Oct. 21, 2011) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00813, File No. SAT-STA-20110912-00177 (Oct. 7, 2011) (Public Notice); *Policy Branch Information; Actions Taken*, Report No. SAT-00802, File No. SAT-STA-20110810-00159 (Aug. 19, 2011) (Public Notice).

Ms. Marlene H. Dortch

The drift to 177.9° E.L. is expected to take approximately eight months.⁴ During the drift of Intelsat 706 from 72.0° E.L. to 177.9° E.L., Intelsat will continue to operate only the satellite's TT&C frequencies and will coordinate the drift with potentially affected operators.

The specific TT&C frequencies are as follows:

Uplink:

6173.7 (LHCP)
6176.3 (LHCP)

Downlink:

3947.5 (RHCP)
3948.0 (RHCP)
3952.5 (RHCP)
3952.0 (RHCP)

Grant of this STA extension request is in the public interest because it will allow Intelsat to flexibly manage its fleet in order to optimize service to customers.

Grant of this STA extension request will not result in increased risk of harmful interference. Intelsat will coordinate the drift with all potentially affected operators. Moreover, Intelsat currently operates Intelsat 602 at 178.0° E.L. without interference.⁵ Intelsat will operate Intelsat 706 at 177.9° E.L. in conformance with its coordination agreements related to the nominal 178.0° E.L. location.

Intelsat has assessed and limited the probability of the space station becoming a source of debris as a result of collision with large debris or other operational space stations. Intelsat 706 will not be located at the same orbital location as another satellite or at an orbital location that has an overlapping station-keeping volume with another satellite. Further, Intelsat is not aware of any

⁴ Intelsat will seek operational authority for Intelsat 706 at 177.9° E.L. in advance of the satellite's arrival at the location.

⁵ See *Policy Branch Information; Actions Taken*, Report No. SAT-00545, File No. SAT-MOD-20080512-00102 (Aug. 8, 2008) (Public Notice).

Ms. Marlene H. Dortch

other FCC licensed system, or any other system applied for and under consideration by the FCC, having an overlapping station-keeping volume with Intelsat 706 at 177.9° E.L. Finally, Intelsat is not aware of any system with an overlapping station-keeping volume with Intelsat 706 at 177.9° E.L. that is the subject of an ITU filing and that is either in orbit or progressing towards launch.

Intelsat requests that the Part 25 waivers originally granted to the Intelsat 706 spacecraft continue to apply at the 177.9° E.L. location, namely, the waivers of Sections 25.202(g), 25.210(a)(1), 25.210(a)(3), 25.210(i) and 25.211(a) of the Commission's rules.⁶

For the reasons set forth herein, Intelsat respectfully requests that the Commission expeditiously grant this request.

Sincerely,

Susan H. Crandall
Assistant General Counsel
Intelsat Corporation
