Re: *Application of Intelsat License LLC to Modify Authorization for Intelsat 706* (call sign S2401), File No. SAT-MOD-20121026-00188

Request for Further Extension of Special Temporary Authority to Drift Intelsat 706 and Request to Begin Operations (call sign S2401), File No. SAT-STA-20130206-00017

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein supplements the above-referenced pending applications seeking permanent and temporary authority to operate Intelsat 706 at 157.0° E.L.

First, the modification application stated that the Intelsat 706 satellite’s authority to operate in the 12.5-12.75 GHz band would not be conditioned on Intelsat remaining a signatory to the Public Services Agreement between Intelsat and the International Telecommunications Satellite Organization (“ITSO”).¹ Intelsat now confirms that the Intelsat 706 satellite’s authority to operate in the 12.5-12.75 GHz band is conditioned on Intelsat remaining a signatory to the ITSO Public Service Agreement.

Second, Intelsat clarifies that although Intelsat 706 has the capability to transmit in the 11700-11950 MHz band, Intelsat does not seek authority to use these frequencies on the Intelsat 706 satellite at the 157.0° orbital location.

¹ See *Application of Intelsat License LLC to Modify Authorization for Intelsat 706*, File No. SAT-MOD-20121026-00188, p. 5 (filed Oct. 26, 2012).

Ms. Marlene H. Dortch
