Intelsat License LLC
IBFS File No. SAT-STA-20190411-00027

IBFS File No(s):	SAT-STA-20190411-00027	<p>GRANTED – With Conditions</p>  <p>International Bureau Satellite Division</p>
Licensee/Grantee:	Intelsat License LLC	
Call Sign:	S2405	
Satellite Name:	Intelsat 901	
Orbital Location: (required station-keeping tolerance)	29.5° W.L. (+/- 0.05 degrees east-west station keeping)	
Administration:	United States of America	
Nature of Service:	Fixed-Satellite Service (FSS)	
Scope of Grant:	Special temporary authority for a period of 30 days to operate Intelsat 901 in the communications frequencies 3625-3700 MHz and 5850-5925 MHz to provide additional capacity at 29.5° W.L..	
Service Area(s):	N/A	
Frequencies:	3625-4200 MHz (space-to-Earth) 5850-6425 MHz (Earth-to-space)	

Unless otherwise specified herein, operations under this grant must comport with the legal and technical specifications set forth by the applicant or petitioner and with Federal Communication Commission's rules not waived herein. This grant is also subject to the following conditions:

1. Intelsat must maintain the Intelsat 901 space station at the 29.5° W.L. orbital location with an east/west longitudinal station-keeping tolerance of ± 0.05 degrees.
2. Intelsat must operate the Intelsat 901 space station at the 29.5° W.L. orbital location in compliance with all existing or future coordination agreements for that location. In the absence of a coordination agreement, such communications must comply with applicable provisions of the ITU Radio Regulations as the Commission cannot guarantee the success of the required coordination.
3. In connection with the provision of service in any particular country, Intelsat is obliged to comply with the applicable laws, regulations, rules, and licensing procedures of that country.
4. The operations of Intelsat 901 and associated earth stations must comport with the applicable uplink and downlink limits in 47 CFR § 25.140(a)(3) of the Commission's rules, unless Intelsat coordinates any non-conforming operations with the operations of U.S.-licensed geostationary orbit space stations within 6 degrees of the 29.5° W.L. orbital location. Intelsat must also comport with the maximum power limits indicated in existing or future coordination agreements at 29.5° W.L. Non-conforming operation must also be coordinated with respect to those operations of non-U.S.-licensed space stations within 6 degrees of 29.5° W.L. involving approved communications with U.S.-licensed earth stations.
5. Intelsat's use of the 3625-3650 MHz (space-to-Earth) frequency band is subject to footnote US107, which limits FSS operations within the United States in the 3600-3650 MHz band on a primary basis to earth stations authorized prior to, or granted as a result of an application filed prior to, July 23, 2015 and constructed within 12 months of initial authorization. Additionally, applications filed after July 23, 2015 to modify these earth stations will not be accepted except for changes in polarization, antenna orientation, or ownership; and increases in antenna size for interference mitigation purposes. All other Fixed-Satellite Service earth station operations in the 3625-3650 MHz band must be on a secondary basis.
6. Communications between U.S.-licensed earth stations and Intelsat 901 in the 3625-3650 MHz (space-to-Earth) frequency band are subject to footnote US245 of the United States Table of Frequency Allocations, 47 CFR § 2.106, US245, which states that the use of non-Federal Fixed-Satellite Service in the 3600-3650 MHz band is limited to international inter-continental systems and is subject to case-by-case electromagnetic compatibility analysis.

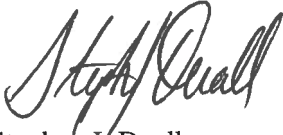

ATTACHMENT TO GRANT
Intelsat License LLC
IBFS File No. SAT–STA–20190411–00027

7. Communications between U.S. licensed earth stations and the Intelsat 901 space station in the 3650-3700 MHz (space-to-Earth) frequency band are subject to footnote NG185 of the United States Table of Frequency Allocations, 47 CFR § 2.106, NG185, which states that the use of the non-Federal Fixed-Satellite Service in the 3650-3700 MHz band is limited to international inter-continental systems.
8. Communications between U.S. licensed earth stations and the Intelsat 901 space station in the 3650-3700 MHz (space-to-Earth) frequency band are subject to footnote NG169 of the United States Table of Frequency Allocations, 47 CFR § 2.106, NG169, which states that after December 1, 2000, operations on a primary basis by the Fixed-Satellite Service (space-to-Earth) in the 3650-3700 MHz frequency band shall be limited to grandfathered earth stations. All other Fixed-Satellite Service earth station operations in the 3650-3700 MHz frequency band shall be on a secondary basis.
9. Operations of Intelsat 901 in the 5850-5925 MHz (Earth-to-space) frequency band are subject to the terms of footnote US245 to the United States Table of Frequency Allocations, 47 CFR § 2.106, US245, which limits the use of the non-Federal Fixed-Satellite Service in this band to international inter-continental systems and is subject to case-by-case electromagnetic compatibility analysis. Intelsat must not claim protection from radiolocation transmitting stations operating in accordance with footnote G2.¹

Licensee/grantee is afforded thirty (30) days from the date of release of this action to decline the grant as conditioned. Failure to respond within this period will constitute formal acceptance of the grant as conditioned. This action is taken pursuant to Section 0.261 of the Commission's rules on delegated authority, 47 CFR § 0.261, and is effective upon release.

Station licenses are subject to the conditions specified in Section 309(h) of the Communications Act of 1934, as amended, 47 U.S.C. § 309(h).

Action Date:	May 16, 2019	
Term Dates	From: May 16, 2019	To: period of 30 days

Approved:

 Stephen J. Duall
 Chief, Satellite Policy Branch

Re: Request for Special Temporary Authority to Operate Intelsat 901 at 29.5° W.L. with New Frequencies; Call Sign: S2405

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests grant of Special Temporary Authority (“STA”)¹ for 30 days, commencing upon grant, to operate Intelsat 901 (S2405) in the communications frequencies 3625-3700 MHz and 5850-5925 MHz in order to provide additional capacity at 29.5° W.L. The proposed operations are expected to last approximately five months.

Intelsat 901 is permanently licensed to operate at 29.5° W.L. in the following bands: 3700-4200 MHz, 5925-6425 MHz, 10950-11200 MHz, and 11450-11700 MHz.² Intelsat is seeking additional authority to operate in 3625-3700 MHz and 5850-5925 MHz to provide additional capacity for customers.

Additionally, Intelsat is seeking to operate under No. 4.4 of the International Telecommunication Union (“ITU”) Radio Regulations. Intelsat has assessed the operational environment near 29.5° W.L. and there are currently no co-frequency operations in 3625-3700 MHz and 5850-5925 MHz within +/- 6 degrees. Intelsat’s proposed operation of Intelsat 901 will be on a non-interference, non-protection basis and will conform with the Federal Communications Commission’s rules governing operations vis-à-vis adjacent locations.

¹ Intelsat has filed this STA request, an FCC Form 159, and a \$980.00 filing fee electronically via the International Bureau’s Filing System.

² See *Policy Branch Information: Actions Taken*, Report No. SAT-01290, File No. SAT-MOD-20170831-00126 (Dec. 15, 2017) (Public Notice). Although Intelsat 901 is capable of operating in the 3625-3700 MHz and 5850-5925 MHz bands, Intelsat did not originally seek authority to operate in these bands at 29.5° W.L.

Ms. Marlene H. Dortch
April 11, 2019
Page 2

Later this year Intelsat will replace Intelsat 901 with Intelsat 904 (S2408) at 29.5° W.L. and will redeploy Intelsat 901.³ Intelsat is currently drifting Intelsat 904 to 29.5° W.L. and the spacecraft is expected to arrive at 29.5° W.L. approximately five months.⁴ In the permanent modification Intelsat will be filing to support the redeployment of Intelsat 904, Intelsat will request that a new U.S. ITU filing be made at 29.5° W.L. for operations in the 3625-3700 MHz and 5850-5925 MHz bands.

The temporary operation of Intelsat 901 in the 3625-3700 MHz and 5850-5925 MHz bands will help provide additional capacity for customers at the nominal 29.5° W.L. location. Accordingly, grant of this STA request is in the public interest.

Sincerely,

/s/ Cynthia J. Grady
