Re: Request for Further Extension of Special Temporary Authority to Operate Intelsat 10 at 47.5° E.L. with New Beam Coverage; Call Sign: S2382

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests an additional 60 days of Special Temporary Authority (“STA”)¹ to operate Intelsat 10’s (Call Sign S2382) Ku-band beam over a new coverage area in the communications frequencies 14250-14500 MHz and 12500-12750 MHz in order to provide customer service.² In support of this request, Intelsat incorporates the map of the new beam coverage filed with its original request.³ Intelsat intends to file a license modification application to support this new service area.

Intelsat 10 is permanently licensed to operate at 47.5° E.L. with a different Ku-band beam coverage than the beam coverage currently being used under STA.⁴ One of the satellite’s Ku-band beams, the

Europe Africa Beam, has been biased in order to achieve the new coverage. Intelsat's operation of Intelsat 10 will continue to conform to existing coordination agreements and the Federal Communications Commission's ("Commission") rules governing operations vis-à-vis adjacent locations. All other beams are unaffected by the Ku-band beam repointing.

The continued temporary operation of Intelsat 10's Ku-band beam with a different coverage than authorized by its current license will allow Intelsat to continue to provide customer service. Accordingly, grant of this further STA extension request is in the public interest.

For the reasons set forth herein, Intelsat respectfully requests that the Commission grant this further STA extension request. Please direct any questions to the undersigned at (703) 559-6949.

Sincerely,
