**Unless otherwise specified herein, operations under this grant must comport with the legal and technical specifications set forth by the applicant or petitioner and with Federal Communication Commission's rules not waived herein. This grant is also subject to the following conditions:**

1. Intelsat must maintain the Intelsat 901 space station at the 29.5° W.L. orbital location with an east/west longitudinal station-keeping tolerance of  $\pm 0.05$  degrees.
2. Intelsat must operate the Intelsat 901 space station at the 29.5° W.L. orbital location in compliance with all existing or future coordination agreements for that location. In the absence of a coordination agreement, such communications must comply with applicable provisions of the ITU Radio Regulations as the Commission cannot guarantee the success of the required coordination.
3. In connection with the provision of service in any particular country, Intelsat is obliged to comply with the applicable laws, regulations, rules, and licensing procedures of that country.
4. The operations of Intelsat 901 and associated earth stations must comport with the applicable uplink and downlink limits in 47 CFR § 25.140(a)(3) of the Commission's rules, unless Intelsat coordinates any non-conforming operations with the operations of U.S.-licensed geostationary orbit space stations within 6 degrees of the 29.5° W.L. orbital location. Intelsat must also comport with the maximum power limits indicated in existing or future coordination agreements at 29.5° W.L. Non-conforming operation must also be coordinated with respect to those operations of non-U.S.-licensed space stations within 6 degrees of 29.5° W.L. involving approved communications with U.S.-licensed earth stations.
5. Intelsat's use of the 3625-3650 MHz (space-to-Earth) frequency band is subject to footnote US107, which limits FSS operations within the United States in the 3600-3650 MHz band on a primary basis to earth stations authorized prior to, or granted as a result of an application filed prior to, July 23, 2015 and constructed within 12 months of initial authorization. Additionally, applications filed after July 23, 2015 to modify these earth stations will not be accepted except for changes in polarization, antenna orientation, or ownership; and increases in antenna size for interference mitigation purposes. All other Fixed-Satellite Service earth station operations in the 3625-3650 MHz band must be on a secondary basis.
6. Communications between U.S.-licensed earth stations and Intelsat 901 in the 3625-3650 MHz (space-to-Earth) frequency band are subject to footnote US245 of the United States Table of Frequency Allocations, 47 CFR § 2.106, US245, which states that the use of non-Federal Fixed-Satellite Service in the 3600-3650 MHz band is limited to international inter-continental systems and is subject to case-by-case electromagnetic compatibility analysis.

All other Fixed-Satellite Service earth station operations in the 3650-3700 MHz frequency band shall be on a secondary basis.
9. Operations of Intelsat 901 in the 5850-5925 MHz (Earth-to-space) frequency band are subject to the terms of footnote US245 to the United States Table of Frequency Allocations, 47 CFR § 2.106, US245, which limits the use of the non-Federal Fixed-Satellite Service in this band to international inter-continental systems and is subject to case-by-case electromagnetic compatibility analysis. authority to continue to operate in the 3625-3700 MHz and 5850-5925 MHz frequency bands in order to continue serving customers in these bands.

Intelsat's continued operation of Intelsat 901 in 3625-3700 MHz and 5850-5925 MHz will be on a non-interference, non-protection basis and will conform with the Federal Communications Commission's ("Commission") rules governing operations vis-à-vis adjacent locations.<sup>5</sup>

For the reasons set forth herein, Intelsat respectfully requests that the Commission grant this further STA extension request. Please direct any questions regarding this request to (703) 559-6949.
