

Request for Special Temporary Authority - Narrative

Planet Labs Inc. (Planet), pursuant to Section 25.120 of the Federal Communications Commission's (FCC's or Commission's) Rules, 47 C.F.R. § 25.120, hereby requests Special Temporary Authority (STA) for an additional Earth-to-space UHF channel to communicate with Planet's Flock constellation, Call Sign S2912. Planet requests the addition of an Earth-to-space channel with a center frequency of 450.1 MHz and a bandwidth of 0.06 MHz, for a period of 180 days.

Grant of this STA request will serve the public interest by allowing Planet to investigate the ability to lower radio interference to the Flock satellite's UHF communications link through use of an additional channel centered at 450.1 MHz. Planet is not requesting any other changes to the Flock authorization, and the additional channel is within the frequency range of 449.75 - 450.25 MHz included in the current Flock Space Station license. Therefore, in order to test the effectiveness of the additional channel, Planet is requesting Special Temporary Authority.
