**Re: Request for Further Extension of Special Temporary Authority to Operate  
Intelsat 1R at 157.1° E.L. with New Beam Coverage; Call Sign: S2368**

Dear Ms. Dortch:

Intelsat License LLC, as debtor in possession (“Intelsat”), herein requests an additional 60 days of Special Temporary Authority (“STA”)<sup>1</sup> previously granted to Intelsat<sup>2</sup> to operate one of Intelsat 1R’s Ku-band beams over a new coverage area in the 11450-11700 MHz and 14000-14250 MHz communications frequency bands in order to provide customer service. A map of the new beam coverage is enclosed as Exhibit A. Intelsat will be filing a license modification application to support this new service area.

Intelsat 1R is permanently licensed to operate at 157.1° E.L. with a different Ku-band beam coverage than described herein.<sup>3</sup> Intelsat is seeking temporary authority to continue repointing the South Pacific Ku-band beam in order to maintain a new coverage area. All other Intelsat 1R beams are unaffected by the Ku-band beam repointing. Intelsat’s continued operation of Intelsat 1R will conform to existing coordination agreements and the Federal Communications Commission’s rules governing operations vis-à-vis adjacent locations.

The continued operation of Intelsat 1R’s Ku-band beam with a new coverage area will allow Intelsat to better meet customers’ service needs. Accordingly, grant of this further STA extension request is in the public interest.

<sup>1</sup> Intelsat has filed this STA request, an FCC Form 159, and a \$980.00 filing fee electronically via the International Bureau’s Filing System.
