Re: Spaceflight, Inc.;
Request for Special Temporary Authority
IBFS File No. SAT-STA-20210205-00017

Dear Ms. Dortch:

This letter serves to call attention to a minor change in the encryption method identified in the application referenced above filed by Spaceflight, Inc. ("Spaceflight").

Spaceflight stated therein that the encryption to be employed for its Sherpa LTE-1 mission would be AES-256. Spaceflight and its relevant vendor are working to enable AES-256 encryption, but this upgrade may not be completed by integration. AES-128 encryption will be the minimum encryption standard for Sherpa-LTE1 Secondary Mission communications.

Please direct any questions regarding this submission to the undersigned.

Sincerely,

Jonathan L. Wiener
Attorney for Spaceflight, Inc.
