Re: Request for Extension of Special Temporary Authority to Operate Galaxy 25 at 66.13° E.L.; Call Sign: S2154

Dear Ms. Dortch:

Intelsat License LLC, as debtor in possession ("Intelsat"), herein requests an additional 60 days of Special Temporary Authority ("STA")¹ previously granted to Intelsat² to operate Galaxy 25 (Call Sign S2154)³ at 66.13° E.L. in order to provide customer service. Galaxy 25 arrived on-station at 66.13° E.L. on November 15, 2021. Intelsat incorporates by reference, its pending amendment application to permanently operate at this location.⁴

On-station at 66.13° E.L., Intelsat will continue to use the following communications frequencies: 3700-4200 MHz and 11700-12200 MHz (space-to-Earth); and 5925-6425 MHz and 14000-14500 MHz (Earth-to-space), and the following telemetry, tracking, and control ("TT&C") frequencies: 4195.5 MHz, 4199.5 MHz, 11702 MHz, and 12198 MHz (space-to-Earth); and 5926.5 MHz and 6423.5 MHz (Earth-to-space).⁵ Galaxy 25's coverage areas are:

- C-band beam: Europe, North Africa, Middle East, and Asia
- Ku-band beams: Europe, North Africa, Middle East, and Asia

¹ Intelsat has filed this STA request, an FCC Form 159, and a \$1,435.00 filing fee electronically via the International Bureau's Filing System.

² See *Satellite Policy Branch Information; Actions Taken*, Report No. SAT-01599, File No. SAT-STA-20211214-00193 (Dec. 23, 2021) (Public Notice).

³ Galaxy 25 is licensed to operate at 93.1° W.L. See *Policy Branch Information; Actions Taken*, Report No. SAT-01203, File No. SAT-MOD-20161004-00097 (Dec. 9, 2016) (Public Notice).

⁴ See *Satellite Policy Branch Information; Space Station Applications Accepted for Filing*, Report No. SAT-01607, File No. SAT-AMD-20211213-00189 (Feb. 4, 2022) (Public Notice).

⁵ The FCC has previously granted Intelsat authorization to use the 11702 MHz and 12198 MHz center frequencies for Galaxy 25 TT&C operations, in addition to its licensed TT&C C-band frequencies. See e.g., *Policy Branch Information; Actions Taken*, Report No. SAT-01394, File No. SAT-STA-20190502-00034 (May 31, 2019) (Public Notice).

Grant of this STA extension request will not result in increased risk of harmful interference. Intelsat will continue to operate Galaxy 25 at 66.13° E.L. in conformance with existing coordination agreements and the Federal Communications Commission's ("FCC") rules governing operations vis-à-vis adjacent locations. Should any interference occur, Intelsat will take all reasonable steps to eliminate such interference.

Intelsat has assessed and limited the probability of the space station becoming a source of debris as a result of collision with large debris or other operational space stations. Galaxy 25 is nominally co-located with Intelsat 17 (Call Sign S2814), which operates at 66.0° E.L.⁶ Intelsat is not aware of any other FCC licensed system, or any other system applied for and under consideration by the FCC, having an overlapping station-keeping volume with Galaxy 25 at 66.13° E.L. Finally, Intelsat is not aware of any other system with an overlapping station-keeping volume with Galaxy 25 that is the subject of an International Telecommunication Union filing and that is either in orbit or progressing towards launch.

Grant of this STA extension request is in the public interest because it will allow Intelsat additional capacity to provide customer service at the nominal 66° E.L. orbital location.

For the reasons set forth herein, Intelsat respectfully requests that the FCC grant this STA extension request.

Please direct any questions regarding this request to the undersigned at (703) 559-7799.

Sincerely,

/s/ W. Ray Rutngamlug
