Re: Request for Further Extension of Special Temporary Authority to Operate
Intelsat 11 at 43.0° W.L. with New C-band Coverage; Call Sign: S2237

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests an additional 60 days of Special Temporary Authority ("STA")¹ previously granted to Intelsat to operate Intelsat 11 (S2237) with new C-band coverage in order to continue providing customer service.²

Intelsat is currently seeking to permanently modify Intelsat 11's coverage area to include the coverage sought herein and to extend the license term.³ Intelsat herein seeks to continue the C-band beam repointing and operations in the resulting coverage in 3700-4200 MHz⁴ (space-to-Earth) and 5925-6425 MHz (Earth-to-space) until this modification application is granted.⁵

Intelsat's continued operations of Intelsat 11 will conform to all applicable coordination agreements and the Federal Communications Commission's rules governing operations vis-à-vis adjacent locations.

¹ Intelsat has filed this STA request, an FCC Form 159, a \$1,600.00 filing fee electronically via the International Bureau's Filing System.

² See *Satellite Policy Branch Information; Actions Taken*, Report No. SAT-01706, File No. SAT-STA-20230125-00009 (Mar. 3, 2023) (Public Notice). See also Intelsat License LLC, Request for Special Temporary Authority, File No. SAT-STA-20230327-00065 (filed Mar. 27, 2023).

³ See *Satellite Policy Branch Information; Space Station Applications Accepted for Filing*, File No. SAT-MOD-20221114-00159 (Jan. 20, 2023) (Public Notice).

⁴ In the contiguous United States, Intelsat will only utilize the 4000-4200 MHz portion of the C-band downlink.

⁵ The satellite's telemetry, tracking, and command frequencies are: 11448 MHz and 11449 MHz (space-to-Earth) and 13246.5 MHz and 13995.5 MHz (Earth-to-space). See Letter from Cynthia J. Grady, Intelsat US LLC, to Marlene H. Dortch, FCC, File No. SAT-STA-20221111-00158 (Nov. 22, 2022).
