

**Request for Special Temporary Authority
Intelsat 902 (S2406)**

Intelsat License LLC (“Intelsat”) herein requests 60 days of Special Temporary Authority (“STA”), commencing August 1, 2026, to operate Intelsat 902 (S2406) at 50.1° W.L. to provide customer services within a different coverage area. Intelsat is also seeking permanent authority for the coverage sought herein.

Intelsat 902 is permanently licensed to operate at 50.1° W.L. with different C-band coverage than requested herein.¹ Intelsat seeks authority to modify the satellite’s platform bias. Only the C-band coverage will be affected by this bias; the new C-band coverage is provided in Exhibit A.

Intelsat’s operations will conform to applicable coordination agreements and the Commission’s rules governing operations vis-à-vis adjacent locations. Should any interference occur, Intelsat will take all reasonable steps to eliminate such interference.

The operation of Intelsat 902 with the requested coverage will allow Intelsat to optimize coverage customers. Accordingly, grant of this STA request is in the public interest.

Respectfully submitted,

Intelsat License LLC
