Notification of Final Orbit Parameters

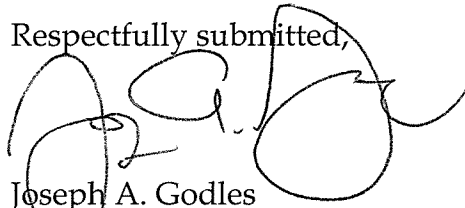

Dear Ms. Dortch:

Telesat Brasil Capacidade de Satelites Ltda. ("Telesat"), by its counsel, hereby notifies the Commission of the end-of-life measures taken for Estrela do Sul 1 (Telstar 14). The satellite ceased regular operation on November 7, 2011. Telesat completed end-of-life maneuvers for the satellite on November 17, 2011, placing it in an orbital position with an apogee of 482 km above the geostationary orbit and a perigee of 387 km above the geostationary orbit. The remaining fuel on the satellite has been consumed or vented; remaining pressurant has been vented; all the electronics have been powered down and disabled; all communications with the satellite have ceased; and the batteries have been left in a permanent state of discharge.
