Dear Ms. Imani Ellis-Cheek

First, we want to thank you for your call alerting us about the necessity of providing the Applicant's certification of awareness and commitment to comply with the Coastal Zone Management Act (16 USC § 1456) (CZMA) and any rule the Commission might adopt under the rulemaking proceeding initiated to ensure compliance of said Act.

Enclosed, you will find a Supplement to the Application for Cable Landing License submitted on behalf of Columbus Networks USA, Inc. on May 15, 2008 (ID: IB2007001161). Said Supplement includes the required certification of awareness and commitment to comply with the CZMA and any related regulation adopted by the Commission. The Supplement also provides the missing information in the original submission regarding the specific geographic location and street addresses of the cable stations at each landing point and the geographic location of the beach joints. The Supplement further provides a list of coordinates for the proposed marine route and maps to illustrate the written information as well as details about the terrestrial infrastructure that will be part of the Colombia-Florida Express (CFX-1) submarine cable system. The information provided in the Supplement completes the Applicant's response to the information requirements under Section 1.767(a)(5) of the Commission's rules.

The Supplement and its attachments are contained in fourteen (14) PDF files. If the large size of some files prevents us from transmitting them with one email, some files will be submitted with a separate email. In any case, a paper copy of the Supplement with its attached table and maps will be mailed to the Policy Division, International Bureau, Federal Communications Commission, and addressed to Mr. Jim Ball, Chief of the Policy Division.

Please do not hesitate to contact our office with any comment or request for additional information, clarifications or corrections. Our goal is to have the Application placed in public notice in its entirety (as supplemented) and accepted for streamlined processing. We have already received a questionnaire from the Department of Homeland Security as part of their review, which we will respond in this same week to ensure that the Commission has all what is needed to grant the Application within the 45-day period that shall start running once the corresponding public notice is release.

7/24/2007

We thank you in advance for the time and effort invested in reviewing and processing the aforementioned application for cable landing license.

Sincerely,

Hector Mora
