Re: viNGN, INC. d/b/a Virgin Islands Next Generation Networks, Inc.—Undersea Cable System Linking the Islands of St. Thomas and St. Croix, USVI—File No. SCL-LIC-20121221-00015

Dear Sir or Madam:

On behalf of viNGN, INC. d/b/a Virgin Islands Next Generation Networks, Inc. (“viNGN”) and pursuant to recent correspondence between the undersigned and Ms. Angela DeMahy of the Commission’s International Bureau, the purpose of this letter is to confirm to the Commission that the above-referenced domestic fiber-optic cable submarine cable system of viNGN linking the Islands of St. Thomas and St. Croix, USVI (“Cable System”), authorized pursuant to the submarine cable license granted by the Commission on February 27, 2013, is in service.

The management of viNGN has changed since the December 21, 2012 submission of the Application for a License to Construct, Land and Operate an Undersea Cable System Linking the Islands of St. Thomas and St. Croix in the U.S. Virgin Islands (the Application”) and the February 27, 2013 issuance of the license. After an exhaustive search, the current management of viNGN and counsel who had filed the Application on behalf of viNGN have not been able to locate the original letter (or copy thereof) notifying the Commission when the viNGN Cable System went into service. In accordance with Ms. DeMahy's instructions, viNGN hereby submits this letter in lieu of its original in-service letter.

As of the filing of the Application, the completion target date was July 2013. It is the understanding of current viNGN management that the in-service date of the Cable System was approximately, August 15th, 2015. That understanding is based on the following information:

- Acknowledgement of completion by viNGN and contractor via Provisional Acceptance Form [see attached];
- Optical time-domain reflectometer (OTDR) Test Result Acceptance Letter [see attached];
- The public announcement from viNGN of the Cable System’s completion <https://vingn.wordpress.com/2015/08/21/vingn-cuts-the-ribbon-on-the-usvi-technological-revolution/>;

VIRGIN ISLANDS NEXT GENERATION NETWORK
"Connecting the VI to the World"

- A newspaper article announcing the Cable System's deployment [see attached];

Should any questions arise concerning this matter, please feel free to contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "H. M. McGibbon".

H. M. McGibbon, Ph.D. & D.B.A.
