Re: File No. SCL-LIC-20171031-00024

Dear Ms. Dortch:

On behalf of GCI Communication Corp. ("GCICC"), I hereby respond to an inquiry made by International Bureau staff by email on December 1, 2017, with respect to the above-referenced cable landing license application for the TERRA-Aleutian cable system. The TERRA-Aleutian system will have 12 fiber pairs, with a current design capacity (using current technology) of 800 Gbps per fiber pair.

Should you require any additional information, please do not hesitate to contact me.

Respectfully submitted,

Kent Bressie
Counsel for GCI Communication Corp.
