**REQUEST OF GU HOLDINGS FOR SPECIAL TEMPORARY AUTHORITY TO
OPERATE U.S.-TAIWAN ROUTE**

GU Holdings Inc. (“GU Holdings”) hereby requests an extension of the special temporary authority (“STA”) granted on September 22, 2020, and extended on March 19, 2021, to continue commercial operation of limited portions of the Pacific Light Cable Network (“PLCN”) prior to the Commission’s grant of the pending application for a license to construct, land, and operate the PLCN system connecting the United States to Taiwan and the Philippines.¹ Specifically, GU Holdings seeks another 180-day extension of the STA to operate the following portions of PLCN connecting the United States to Taiwan:

- The fiber pair owned by GU Holdings and its affiliates connecting the United States to Branching Unit 1 (Fiber Pair 2 on each of Segments S1.1.1 and S.1.1.2);²

¹ See GU Holdings Inc. and Edge Cable Holdings USA, LLC, *Application for a License to Construct, Land, and Operate the Pacific Light Cable Network to Connect the United States to Taiwan and the Philippines*, FCC File No. SCL-LIC-20200827-00038 (filed Aug. 27, 2020) (*2020 License Application*).

² For segment references, see Appendix A hereto.

- The branch owned by GU Holdings’ affiliates connecting Taiwan to Branching Unit 1, including the two fiber pairs on that branch (Segment S2);
- The common equipment necessary to operate Fiber Pair 2 between the United States and Taiwan.

These are the same portions of PLCN that were authorized for operation in the STA granted on September 22, 2020, and extended on March 19, 2021.³

With this extension request, GU Holdings does not seek authority to commence commercial operation of Segments S1.2 or S3, or Fiber Pair 1 owned by Edge Cable Holdings USA (“Edge USA”) and its affiliates. For clarity, the instant request for STA extension would not authorize any commercial traffic on PLCN to or from the Philippines, nor any operation of the system by Edge USA or its affiliates. It also would not authorize any commercial traffic on the Hong Kong Path, as that term is defined in the underlying application, nor any operation of the system by Pacific Light Data Communications Co., Ltd. (“PLDC”), which retains an interest in unused fiber pairs and system common equipment but is excluded as an applicant for the cable landing license for reasons described in the underlying application.⁴

Delay or denial of the requested STA extension beyond September 15, 2021, would impose significant economic costs on GU Holdings and preclude the public benefits of substantial additional capacity on the U.S.-Taiwan route. The Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector (the “Committee”) has been notified of this request. Further, GU Holdings is authorized to state that Edge USA concurs in this request.

³ See Public Notice, *Actions Taken Under Cable Landing License Act*, Report No. SCL-00285, 2 (issued Sept. 24, 2020); Public Notice, *Actions Taken Under Cable Landing License Act*, Report No. SCL-00309, 2 (issued Mar. 26, 2021).

⁴ See *2020 License Application* at 2, 6-7.

GU Holdings acknowledges that grant of such STA extension will not prejudice action by the Commission on the underlying application, and that such STA is subject to cancellation or modification upon notice without a hearing.

I. BACKGROUND

On August 27, 2020, the Applicants applied for authority to construct, land, and operate PLCN, a high-capacity fiber-optic submarine cable system connecting the U.S., Taiwan, and the Philippines.⁵ On September 11, 2020, the Commission placed the application on public notice.⁶ On September 16, 2020, the Committee notified the Commission that it intended to review the application.⁷ On December 9, 2020, the Committee notified the Commission that the Applicants had provided complete responses to questions posed by the Committee and that the Committee was beginning an initial review of national security or law enforcement interests of the United States.⁸ On April 22, 2021, the Committee notified the Commission that it determined that a secondary assessment was warranted because risk to national security or law enforcement interests could not be mitigated by standard mitigation measures.⁹ The secondary review of the license application is ongoing.

Also on August 27, 2020, GU Holdings requested STA to operate the portions of PLCN connecting the United States with Taiwan, which were fully constructed, tested, and ready for

⁵ See *2020 License Application*.

⁶ See Public Notice, *Non-Streamlined Submarine Cable Landing License Applications Accepted for Filing*, Report No. SCL-00282NS, 2-3 (issued Sept. 11, 2020).

⁷ See Letter from Alice Suh Jou, Attorney, Nat'l Sec. Div., DOJ, to Marlene H. Dortch, Sec'y, FCC, FCC File No. SCL-LIC-20200827-00038 (filed Sept. 16, 2020).

⁸ See Letter from Alice Suh Jou, Attorney Advisor, Foreign Inv. Review Section, DOJ, to Marlene H. Dortch, Sec'y, FCC, FCC File No. SCL-LIC-20200827-00038 (filed Dec. 9, 2020).

⁹ See Letter from Alice Suh Jou, Attorney, Foreign Inv. Review Section, DOJ, to Marlene H. Dortch, Sec'y, FCC, FCC File No. SCL-LIC-20200827-00038 (filed Apr. 22, 2021).

commercial operation prior to the rest of the system.¹⁰ On September 22, 2020, the Commission granted GU Holdings' STA request for 180 days.¹¹ On March 8, 2021, GU Holdings requested an extension of the STA.¹² On March 19, 2021, the Commission granted GU Holdings' request and extended the STA another 180 days, through September 15, 2021.¹³ GU Holdings' STA to operate the U.S.-Taiwan portion of PLCN is conditioned on GU Holdings abiding by the commitments and understandings contained in a provisional national security agreement dated April 7, 2020, and extended September 18, 2020 and again March 18, 2021, between GU Holdings and the Committee.¹⁴

II. THE U.S.-TAIWAN ROUTE WILL BE OPERATED SEPARATELY AND INDEPENDENTLY

Under the requested STA extension, GU Holdings seeks authority to continue commercial operation (including any associated further construction, connection, and testing that may be necessary) of only the fiber pair, segments, and common equipment providing connectivity between the United States and Taiwan. Independent operation of the U.S.-Taiwan route is commercially and technically feasible, and consistent with the public interest.

¹⁰ See GU Holdings Inc., *Request for Special Temporary Authority to Operate U.S.-Taiwan Route*, FCC File No. SCL-STA-20200827-00037 (filed Aug. 27, 2020).

¹¹ See Public Notice, *Actions Taken Under Cable Landing License Act*, Report No. SCL-00285, 2 (issued Sept. 24, 2020).

¹² See GU Holdings Inc., *Request for Special Temporary Authority to Operate U.S.-Taiwan Route*, FCC File No. SCL-STA-20200827-00037 (filed Mar. 8, 2020).

¹³ See Public Notice, *Actions Taken Under Cable Landing License Act*, Report No. SCL-00309, 2 (issued Mar. 26, 2021).

¹⁴ See DOJ, *et al.*, *Petition to Adopt Conditions for Special Temporary Authority*, FCC File Nos. SCL-STA-20200827-00037 and SCL-LIC-20200827-00038 (filed Sept. 18, 2020); *Second Extension of Provisional National Security Agreement for Requested Special Temporary Authority* (filed Mar. 19, 2021).

Specifically,

- PLCN’s owners do not share fiber pairs. Each owner holds title to separate fiber pairs with separate submarine line terminating equipment, and each will operate those fiber pairs and equipment independent of the other owners;
- Operation of Fiber Pair 2, Segment S2, and the common equipment on Segments S1.1.1 and S1.1.2 does not depend on any equipment housed in the Philippines, and Edge USA has no independent access rights to any equipment housed in the United States or Taiwan. Within the U.S. cable landing station, each party is assigned a separate cage for housing equipment supporting their individual fiber pairs (e.g., submarine line terminating equipment), and a fourth cage houses equipment supporting operation of all fiber pairs (e.g., power feeding equipment). GU Holdings holds exclusive approval authority for all persons accessing any of these cages;
- Edge USA and its affiliates hold no voting rights on Segment S2 connecting to Taiwan; rather, an affiliate of GU Holdings holds 100 percent of the voting rights on Segment S2; and
- Edge USA and its affiliates are contractually prohibited from using their participation interest in the system to interfere with the ownership or rights of use of GU Holdings .¹⁵

As a result of these existing provisions, Edge USA will not have any role in the requested operation of the U.S.-Taiwan route. Furthermore, Edge USA by contract may not interfere with the ownership or rights of use of GU Holdings. The 2020 Application pending before the Commission describes how PLCN will be operated independently and without the intervention of PLDC.¹⁶

¹⁵ Section 5.6 of the Joint Build Agreement by and between the PLCN owners states:

Each Party . . . shall not use any Minimum Investment Unit or capacity or spectrum on its Minimum Investment Unit(s) in any manner such as to interfere with the ownership or right of use of any other Party, and use commercially reasonable efforts to ensure that its Affiliates, agents, employees, contractors and other persons within its reasonable control comply with the foregoing[.]

¹⁶ See *2020 License Application* at 6-7.

III. GRANT OF THE STA WILL SERVE THE PUBLIC INTEREST

Grant of the requested STA extension will serve the public interest, convenience, and necessity and otherwise comply with U.S. law and Commission regulations.

The U.S.-Taiwan portion of PLCN is currently providing critical commercial service for GU Holdings and its affiliates under the existing STA. In particular, it connects Google's Taiwan data center to Google data centers in the United States and thereby supports Google's services to users throughout the Asia-Pacific region. Losing access to PLCN's U.S.-Taiwan capacity at the expiration of the existing authority would significantly reduce the value of large, recent capital investments Google has made in the United States.

Grant of the STA extension request will also help ensure realization of other public benefits identified in the pending license application, including increasing competition on the U.S.-Taiwan route and enhancing the service quality, redundancy, and resilience of communications systems in the region through route diversity.¹⁷

GU Holdings is not aware of any national security issues associated with continued operation of the U.S.-Taiwan segment by GU Holdings, under the terms described above.

IV. CONCLUSION

For the foregoing reasons, the Commission should grant to GU Holdings as expeditiously as possible, and in any event no later than September 15, 2021, a 180-day extension of the STA to operate on a commercial basis the fiber pairs, segments, and common equipment connecting

¹⁷ *Id.* at 2.

the United States with Taiwan, while proceeding with its consideration of the application for a cable landing license.

Respectfully submitted,
