

November 20, 2009

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
Washington, DC 20554

To: International Bureau, Satellite Division
Re: Notification Concerning Completion of C-Band ESV Coordination for East Coast, U.S.A. - WB36 - File No. SES-AFS-20080724-00975

Dear Ms. Dortch:

Vizada, Inc. ("Vizada") hereby submits per Section 25.221(e) of the Commission's rules for Earth Stations on Vessels (ESV) this notification of successfully-completed frequency coordination. As specified in the Commission's Public Notice DA 05-1671, Released: June 15, 2005 the following information is provided so that this notification may be placed on Public Notice:

1. Name and contact information of the frequency coordinator –

Skjei Telecom, Inc., 7777 Leesburg Pike, Suite 315N, Falls Church, VA 22043, voice: (703)917-4020, fax: (703)917-0098

2. Reference identification, date, and duration (if relevant) of the coordination report –

Job number 090810SKJTEL01; October 18, 2009; 6 months beginning October 18, 2009 and extensions of 6 months each if needed.

3. Frequency coordination method used –

Critical Contour Point method

4. Interference criteria used –

Long term -154.0 dBW/4 kHz 20%; Short term -131.0 dBW/4 kHz 0.0025%

5. Speed of coordinated vessel, if relevant –

Not relevant

6. Center frequencies, bandwidths, and total spectrum coordinated per satellite -

5851.0-5860.0; 102 kHz to 205 kHz; 9.0 megahertz
5920.0-5923.0; 102 kHz to 205 kHz; 3.0 megahertz
5948.0-5959.0; 102 kHz to 205 kHz; 11.0 megahertz
5960.0-5970.0; 102 kHz to 205 kHz; 10.0 megahertz
6420.0-6423.0; 102 kHz to 205 kHz; 3.0 megahertz

Total spectrum coordinated - 36.0 megahertz

All frequencies on NSS-7 @ 338.0 E. latitude

Vizada recognizes that the 5851.0-5860.0 and 5920.0-5923.0 frequencies are not within the range of C-Band frequencies specified by § 25.202 (a)(8) for use by ESVs and the WB36 C-Band ESV authority does not authorize use of these frequencies. Vizada requested that the frequency coordinator coordinate these frequencies and is including them in this filing so that if at some time in the future Vizada seeks special authority to utilize them for ESVs the successful coordination of same will be a matter of record. Vizada is not however seeking authority to use the 5851.0-5860.0 or 5920.0-5923.0 frequencies for ESVs at this time.

7. Name of satellite(s) and transponder(s) being used –

NSS-7 @ 338.0 E. latitude

Transponders WHL1, WHL2 and WHL6

8. Textual description and scaled map of the geographic area(s) coordinated –

East Coast of the U.S.A. Scaled maps are set forth in the accompanying exhibit.

9. 24/7 contact information for the ESV operator –

Vizada Security Officer (301) 838-7700

10. Call sign of the hub station if independently licensed –

WB36

11. Statement indicating that as of the date of this notification there are no unresolved coordination requests which would result in an exceedance of the maximum 180 megahertz of coordinated spectrum for all ESV operations in the coordination area in Section 25.202(a)(8) –

The frequency coordinator advises that there are no unresolved coordination requests which would result in an exceedance of the maximum 180 megahertz of coordinated spectrum for all ESV operations in the coordination area in the 5925-6425 MHz band.

Vizada respectfully requests that this notification of successfully completed frequency coordination be placed on Public Notice. Any further questions with respect to this matter may be directed to James G. Lovelace at (301)838-7909.

Respectfully submitted,

A handwritten signature in black ink that reads "Robert W. Swanson". The signature is fluid and cursive, with a horizontal line extending to the right at the end.

Robert W. Swanson
