**Re: Application of National Digital Television Center, Inc. for
Denver, Colorado Area
(SES-AMD-20050911-01241)**

Dear Ms. Dortch:

National Digital Television Center, Inc. ("NDTC") by its attorney and pursuant to Section 25.110(a) of the Commission's Rules, 47 C.F.R. § 25.100(a), hereby provides the following clarifying information regarding the "receive" element of its above-referenced proposed transmit/receive earth station in the Denver, Colorado area. In its application, NDTC identified its proposed earth station as "transmit/receive" in response to Question No. 26 on FCC Form 312, as the station will uplink to in the 6 GHz band and will receive radionavigation-satellite service ("RNSS") signals from the satellite in the 1176 MHz and 1574 MHz bands. Specifics on the technical characteristics of both directions were provided in response to the information requests in Schedule B of the FCC Form 312. NDTC is providing this clarification, in response to a request from the Commission's staff regarding the proposal for the reception of RNSS for the reception of RNSS signals at the proposed earth station. Since it is NDTC's understanding that there is not a requirement to have an earth station license from the Commission to receive the RNSS signals transmitted from the RPS-1 satellite in the 1176 MHz and 1574 MHz frequency bands, the information in the application pertaining to these bands may be considered as having been provided for information only.

Ms. Marlene Dortch
