

EXHIBIT A
DESCRIPTION OF REQUEST FOR MINOR AMENDMENT

Pursuant to Section 25.116 of the Commission’s rules, DIRECTV Enterprises, LLC (“DIRECTV”) hereby submits a minor amendment to its pending request for authorization to operate a transmit-receive earth station (call sign E120148) in Long Beach, California solely to reduce the clear sky EIRP and EIRP density values requested for the emission designators in the 13.75-14.0 GHz band. For ease of reference, the initial values and the amended values are set forth below. DIRECTV hereby certifies that the remaining information in its original application has not changed.

Emission Designator	Initial Max EIRP (dBW)	Initial EIRP Density (dBW/4 kHz)	New Max EIRP (dBW)	New EIRP Density (dBW/4 kHz)
1M44G1W	68.3	42.7	64.9	39.3
2M20G1W	70.1	42.7	66.7	39.3
2M90G1W	71.3	42.7	67.9	39.3
51K2G1W	53.8	42.7	50.4	39.3
5M00G1W	73.7	42.7	70.3	39.3
24M0G7W	80.5	42.7	77.1	39.3
27M0G7W	80.5	42.2	77.1	38.8
36M0G7W	80.5	41.0	77.1	37.6

Because this amendment does not change the proposed frequencies or orbital locations involved, and actually reduces the potential for interference by reducing the power of the earth station’s operations, it should be treated as a minor amendment and processed accordingly. Grant of this application will serve the public interest by supporting DIRECTV’s ongoing direct-to-home video operations.
