Re: O3b Limited  
File Nos. SES-LIC-20130528-00455 and  
SES-AMD-20131025-01138

Dear Ms. Dortch:

This filing clarifies one element of the above-referenced application, in which O3b Limited ("O3b") has requested, among other things, a waiver of the Commission's Ka-band Plan, the U.S. Table of Allocations, and any other applicable operational rule, with respect to O3b's operation of earth stations on non-U.S.-registered maritime vessels located in or near U.S. territorial waters. The earth stations will communicate with O3b's non-geostationary satellite orbit Fixed-Satellite Service system.

O3b hereby clarifies that it will not commence operations pursuant to these waivers on any maritime vessel until the administration that has registered the maritime vessel has authorized O3b's earth station operations on the vessel.

Respectfully submitted,

A handwritten signature in black ink that reads "Joslyn Read". The signature is fluid and cursive, with a long, sweeping underline that extends to the left.
