

**Supplement to Non-Compliant Antenna Waiver Request.**

**Attached, per FCC request, are 12 antenna pattern data tables in support of the pending non-compliant antenna waiver request for pending application for Televisa MOB-4. For informational purposes, all of the worst case numbers appear to be positive, but they are negative. What appears to be a dash in the line above the worst case numbers is actually a minus which should appear before the worst case numbers, because all of them clear. The RF transmit density used in the calculations on the tables was -20.6 dBW/4 kHz.**
