

**Narrative for Amendment Application**

Pursuant to Section 25.116 of the Federal Communications Commission's Rules ("FCC"),<sup>1</sup> HNS License Sub, LLC ("Hughes") files this application to amend IBFS File No. SES-LIC-20150604-00341 (filed on May 28, 2015). This amendment provides revised location data for the Earth station antenna due to a clerical error in the original application.

The revised location information is provided on the attached Form 312, Schedule B. In the Form 312 and the accompanying Schedule B, Hughes has only provided information that is required to complete the form and/or information that has changed as a consequence of the new planned location of the site. All other data provided in IBFS File No. SES-LIC-20150604-00341 remains unchanged.

**Frequency Coordination**

On July 22, 2015, Hughes ordered a new frequency coordination report from Comsearch, which is expected to be completed around August 21, 2015. When frequency coordination is completed, Hughes will supplement this amendment application.

**Notice to the Federal Aviation Administration ("FAA") under Part 17 of the FCC's rules**

Notification to the FAA is not required for this proposed Earth station under Part 17 of the FCC's rules.<sup>2</sup> The site is not more than 200 feet above ground level, the site passes the slope criteria, and the site is not in an instrument approach area.<sup>3</sup> A copy of the FCC's TOWAIR report is provided with this amendment.
