

INFORMATION ON USE OF NON-U.S. LICENSED SATELLITES

GUSA Licensee LLC's (together with its parent, Globalstar, Inc., "Globalstar") proposed modified fixed earth station in Sebring, Florida will transmit signals to and receive signals from Globalstar, Inc.'s second-generation Big LEO satellites, which are licensed by France, a member of the World Trade Organization ("WTO"). Globalstar's French-licensed satellites will be used for services covered under the WTO Basic Telecommunications Agreement. Accordingly, no showing relating to effective competitive opportunities is required with the instant notice of minor modification.
