Yes, you will likely need to confer with your team. The sole purpose of the amendment is to clarify that GEE is requesting a waiver of the table of allocations to the extent required to permit it to receive signals transmitted by Eutelsat (@ 139W) and Intelsat (@ 143 W) in parts of the 12.2-12.75 GHz downlink band. These transmit activities have already been authorized pursuant to waivers of the allocation table granted to the two satellite operators. Of course, all such transmissions are required to be on a non-protected, non-harmful interference basis.

Best regards,
David

Hi David,

I was reviewing your AMD and am confused about this application.

I'm just an engineer and would have to check with the team.

Can you please clarify this?

Thanks.

“Global Eagle hereby amends its pending ESAA modification application to add a request for waiver of the FCC's rules to the extent required to permit reception of downlink signals in the 12.2-12.75

GHz band from the Eutelsat 139 WA and Hispasat 143 W-1 satellites, which are already authorized to transmit in all or part of these bands. No other changes to the application are proposed in this amendment.”
