

Description of Amendment

In this application, Viasat seeks an amendment to correct the location information previously filed in Form 312 (Schedule B) for the Fargo, GA earth station in call sign E210132 (File No. SES-LIC-20210719-01086).

The longitude coordinate value in question E12 of Form 312 Schedule B contained a typographical error. The longitude value entered was 82° 24' 4.79" N and the correct value which should have been entered is 82° 34' 4.79" N.

The proper longitude value is entered in the corrected Schedule B filed with this amendment.

All other information for the application is correct and remains unchanged.
